subject. This book is a collection of best answers for the "Corporate Finance" subject.

This open access book discusses firm valuation, which is of interest to economists, particularly those working in finance. Firm valuation comes down to the calculation of the discounted cash flow, often only referred to by its abbreviation, DCF. There are, however, different coexistent versions, which seem to compete against each other, such as entity approaches and equity approaches. Acronyms are often used, such as APV (adjusted present value) or WACC (weighted average cost of capital), two concepts classified as entity approaches. This book explains why there are several procedures and whether they lead to the same result. It also examines the economic differences between the methods and indicates the various purposes they serve. Further it describes the limits of the procedures and the situations they are best applied to. The problems this book addresses are relevant to theoreticians and practitioners alike.--

In *Venture Capital and the Finance of Innovation*, future and current venture capitalists will find a useful guide to the principles of finance and the financial models that underlie venture capital decisions. Assuming no knowledge beyond concepts covered in first-year MBA course, the text serves as an innovative model for the valuation of start ups, and will familiarise you with the relationship between risk and return in venture capital, historical statistics on the performance of venture capital investments, total and partial valuation--and more.

An accessible introduction to the proven method of value investing. anyone can learn how to use it in his or her own investment endeavors. Written in a straightforward and accessible style, this book helps readers gain an overall understanding of the value approach to investing and presents statistics that reveal the overwhelming success of this approach through a variety of markets. Engaging and informative, *Getting Started in Value Investing* skillfully shows readers how to look for undervalued companies and provides them with the tools they need to succeed in today's markets. Charles S. Mizrahi (Brooklyn, NY) is Managing Partner of CGM Partners Fund LP. He is also editor of *Hidden Values Alert*, a monthly newsletter focused on value investing. Mizrahi has more than 25 years of investment experience and is frequently quoted in the press. Many of his articles appear online at gurufocus.com as well as on other financial sites.

What is the return to investing in the stock market? Can we predict future stock market returns? How have equities performed over the last two centuries? The authors in this volume are among the leading researchers in the study of these questions. This book draws upon their research on the stock market over the past two dozen years. It contains their major research articles on the equity risk premium and new contributions on measuring, forecasting, and timing stock market returns, together with new interpretive essays that explore critical issues and new research on the topic of stock market investing. This book is aimed at all readers interested in understanding the empirical basis for the equity risk premium. Through the analysis and interpretation of two scholars whose research contributions have been key factors in the modern debate over stock market performance, this volume engages the reader in many of the key issues of importance to investors. How large is the premium? Is history a reliable guide to predict future equity returns? Does the equity and cash flows of the market? Are global equity markets different from those in the United States? Do emerging markets offer higher or lower equity risk premia? The authors use the historical performance of the world's stock markets to address these issues.
