Astrocytes can be defined as the glia inhabiting the nervous system with the main function in the maintenance of nervous tissue homeostasis. Classified into several types according to their morphological appearance, many of astrocytes form a reticular structure known as astroglial syncytium, owing to their coupling via intercellular channels organized into gap junctions. Not only do astrocytes establish such homocellular contacts, but they also engage in intimate heterocellular interactions with neurons, most notably at synaptic sites. As synaptic structures house the very core of information transfer and processing in the nervous system, astroglial perisynaptic positioning assures that these glial cells can nourish neurons and establish bidirectional communication with them, functions outlined in the concepts of the astrocytic cradle and multi-partite synapse, respectively. Astrocytes possess a rich assortment of ligand receptors, ion and water channels, and ion and ligand transporters, which collectively contribute to astrocytic control of homeostasis and excitability. Astroglia control glutamate and adenosine homeostasis to exert modulatory actions affecting the real-time operation of synapses. Fluctuations of intracellular calcium can lead to the release of various chemical transmitters from astrocytes through a process termed gliotransmission. Sodium fluctuations are closely associated to those of calcium with both dynamic events interfacing signaling and metabolism. Astrocytes appear fully integrated into the brain cellular circuitry, being an indispensable part of neural networks.

Eleni Pachoumi looks at the concepts of the divine in the Greek magical papyri by way of a careful and detailed analysis of ritual practices and spells. Her aim is to uncover the underlying religious, philosophical and mystical parallelisms and influences on the Greek magical papyri. She starts by examining the religious and philosophical concept of the personal daimon and the union of the individual with his personal daimon through the magico-theurgic ritual of systasis. She then goes on to analyze the religious concept of paredros as the divine "assistant" and the various relationships between paredros, the divine and the individual. To round off, she studies the concept of the divine through the manifold religious and philosophical assimilations mainly between Greek, Egyptian, Hellenized gods and divine

Read Book Jcb 531 70 533 105 535 95 535 125 535 140 536 60 540 140 540 170 541 70 550 140 550 170 Telescopic Handler Repair Service Manual Instant

abstract concepts of Jewish origins.

More than 18 million people in the United States have diabetes mellitus, and about 90% of these have the type 2 form of the disease. This book attempts to dissect the complexity of the molecular mechanisms of insulin action with a special emphasis on those features of the system that are subject to alteration in type 2 diabetes and other insulin resistant states. It explores insulin action at the most basic levels, through complex systems.

Tell Me No Lies is a celebration of the very best investigative journalism, and includes writing by some of the greatest practitioners of the craft: Seymour Hersh on the My Lai massacre; Paul Foot on the Lockerbie cover-up; Wilfred Burchett, the first Westerner to enter Hiroshima following the atomic bombing; Israeli journalist Amira Hass, reporting from the Gaza Strip in the 1990s; Gunter Wallraff, the great German undercover reporter; Jessica Mitford on 'The American Way of Death'; Martha Gelhorn on the liberation of the death camp at Dachau. The book - a selection of articles, broadcasts and books extracts that revealed important and disturbing truths - ranges from across many of the critical events, scandals and struggles of the past fifty years. Along the way it bears witness to epic injustices committed against the peoples of Vietnam, Cambodia, East Timor and Palestine. John Pilger sets each piece of reporting in its context and introduces the collection with a passionate essay arguing that the kind of journalism he celebrates here is being subverted by the very forces that ought to be its enemy. Taken as a whole, the book tells an extraordinary 'secret history' of the modern era. It is also a call to arms to journalists everywhere - before it is too late.

The medieval Ashkenazi manuscripts of the Small Book of Commandments (Sefer Mitzvot Katan, or 'SeMaK' for short), which was written by Isaac of Corbeil, attest a scribal culture in which rabbinical knowledge and piety were combined with creative freedom in manuscript design. This study is concerned with the creation, composition and circulation of manuscripts of the SeMaK and concentrates on the book as an artefact. The focus of the author's attention is the manuscripts' material nature, their artistic embellishment and the personal touches that scribes added to them. With the act of writing a text and

Read Book Jcb 531 70 533 105 535 95 535 125 535 140 536 60 540 140 540 170 541 70 550 140 550 170 Telescopic Handler Repair Service Manual Instant

decorating a SeMaK manuscript, they 'appropriated' the text, so to speak, giving it a character of its very own. They drew on a visual language in the process - or rather, on visual languages, which occupy a special place between pure writing culture and pure painting culture. It was in this area 'in between' the two that spontaneous touches arose, ranging from changes in the physical arrangement of the text (mise-en-page) to drawings and doodles added in the margins. An examination of paratextual elements broadens the reader's knowledge about Jewish scribal culture and grants insights into medieval book art, material culture and Judeo-Christian co-existence in the Middle Ages as well as throwing some light on Jewish values, ideals and eschatological hopes.
