The Paper Jet Engine : 5 Steps - Instructables

Jet engines make their jet from propellant stored in tanks that are attached to the engine (as in a 'rocket') as well as in duct engines (those commonly used on aircraft) by ingesting an external fluid (very typically air) and expelling it at higher speed.

---

Jet engine - Wikipedia

Thrust is produced by the jet engines: they suck the air in, squeeze it, burn fuel in it, leading to expansion and exhaust it on the other side. That creates a reaction that causes the plane to ...
