We are glad to introduce you the proceedings of the first International Conference on Economics, Business and Social Humanities (ICONEBS 2020). The 1st ICONEBS 2020 addresses challenges and innovations in the field of economics, business, and social humanities. The conference is enriched with renowned keynote speakers who discuss in the central theme of "The Dynamics of Economics, Business, and Social Humanities". The ICONEBS conference is hosted by State Polytechnic of Madiun and co-hosted by Aviation Polytechnic of Surabaya and Polytechnic of Jambi. This year, we held this flexible online conference to gather experts and scholars around the globe with the aim to continue disseminating the latest advanced research in the field of the dynamics of economics, business, and social humanities. We are glad to share with you that around 102 pre-registered authors are submitted their work in the conferences. However, its about 60 papers are selected and accepted for the conferences. All the papers have been through rigorous review by a panel of reviewers who provide critical comments and corrections, and have contributed substantially to the improvement of the quality of the papers to meet the requirements of International publication standard. We would like to express our sincere gratitude to the Chairman, the distinguished

keynote speakers, as well as all the participants. We also want to thank the publisher for publishing the proceedings. May the readers could enjoy the gain some valuable knowledge from it. We are expecting more and more experts and scholars from all over the world to join this international event next year.

This textbook, for journalism students in the Japanese EFL context, confronts globalization as a dominant and homogenizing force assailing the social and political worlds. It encourages young people to address inequities, to inquire and write, to understand the history of dominance, and to value local culture and traditions as signs of resurgence. Students are supported and guided on the path of carrying out investigations, citing sources, and using conventional rhetorical techniques in reporting that express local values and concerns.

Primary Newborn Care is specifically for nurses and doctors in level 1 clinics and hospitals. The course addresses the care of infants at birth, care of normal infants, care of low-birth-weight infants, neonatal emergencies, and common minor problems in newborn infants.

Essential Data Critical Care Nurses Must Know Endorsed by the American Association of Critical-Care Nurses, this go-anywhere handbook features tables and figures that encapsulate all the information required to give safe and effective care to critically ill patients. Contents include: Critical Care Drug Tables • Normal Values for Laboratory Tests and Physiologic Parameters • Lists of Assessment Components • Cardiac Rhythms: ECG Characteristics and Treatment Guides, Including Sample Rhythm Strips • 12-Lead ECG Changes in Acute Myocardial Ischemia and Infarct • Troubleshooting Guide for Hemodynamic Monitoring Equipment • Indications for Mechanical Ventilation • Weaning Assessment Tool • ACLS Algorithms.

This monograph explores the mechanisms and timing of possible etiologic events that contribute to fetal and neonatal neurologic injury. the report presents evidence that most cases of cerebral palsy are a result of multifactorial and unpreventable causes that occur during fetal development or in the newborn after delivery, and not a result of an isolated intrapartum hypoxic event. the report contains a set of criteria that may be used to define (or rule out) an acute intrapartum hypoxic event sufficient to cause or suggest cerebral palsy.

"Pediatric Neurocritical Care is by far the most comprehensive book I have read dealing with this topic... This text will provide an excellent reference for those interested in the pediatric intensive care cases or pediatrics in general. It is written very well and is chock-full of information that Practitioners in a pediatric ICU setting would use." --Donna Jacobs, R. EEG T., CNIM, The Neurodiagnostic Journal Caring for children with neurocritical illness often requires multi-specialty collaboration and the understanding of an ever-

expanding body of data. This book gives clinicians the up-to-date, concise, and clinically relevant guidance they need to provide optimal care to children with these acute neurologic disorders. The chapters in *Pediatric Neurocritical Care* are authored by experts in each individual topic, and co-edited by a neurologist and intensivist to ensure that all topics have been fully addressed from both perspectives. The book covers the complete continuum of care from assessment, monitoring, and condition specific management through rehabilitation. Early chapters present differential diagnosis and management approaches to common overarching problems such as coma, headache, and elevated intracranial pressure, followed by chapters focusing on the evaluation and management of specific conditions including traumatic brain injury, stroke, seizures, central nervous system infections, and demyelinating disorders. The final chapters address important associated psychological, social, and ethical issues. To reflect the full spectrum of specialties involved in the burgeoning field of pediatric neurocritical care, the book brings together an international group of experts from multiple disciplines including critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, psychology, and pediatric subspecialties. *Pediatric Neurocritical Care* features: Every topic is addressed from a neurologic and critical care perspective.

Comprehensive coverage includes the evaluation of common overarching problems and management of specific conditions, in addition to discussion of related psychological, ethical, and social issues. Chapters are written by internationally known experts from the fields of critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, and many affiliated specialties.

Neonatology at a Glance provides a concise, illustrated overview of neonatal medicine. Written by leading international experts, it provides essential information on perinatal medicine, delivery, the normal newborn infant and neonatal problems encountered in neonatal intensive care units and their management. Each topic is supported by excellent illustrations, diagrams, and, for the first time, video clips to show neonatal resuscitation and stabilizing the sick newborn, normal examination, the baby with hypoxic-ischemic encephalopathy, recognition of seizures and practical procedures. *Neonatology at a Glance*:

- Provides up to date coverage of the important conditions you will encounter
- Covers challenging topics including pain, ethical issues, quality improvement, evidence based medicine and palliative care
- Features new sections on fetal medicine, respiratory support, therapeutic hypothermia, amplified EEG and perinatal neuroimaging
- Integrates invaluable details about practical procedures including neonatal resuscitation and transport
- Supplemented by video materials and artwork which can be viewed via the companion website at www.ataglanceseries.com/neonatology

Neonatology at a Glance is the perfect guide for all health professionals looking after newborn infants, including pediatric trainees, medical students, neonatal nurse practitioners and neonatal nurses, therapists and midwives. For

neonatologists, pediatricians and nurse tutors it is a valuable resource to assist with teaching.

First published in 1917 as 'Midwifery', Obstetrics by Ten Teachers is well established as a concise, yet comprehensive, guide within its field. The twentieth edition has been thoroughly updated by a new team of 'teachers', integrating clinical material with the latest scientific developments that underpin patient care. Each chapter is highly structured, with learning objectives, definitions, aetiology, clinical features, investigations, treatments, case histories and key point summaries and additional reading where appropriate. New themes for this edition include 'professionalism' and 'global health' and information specific to both areas is threaded throughout the text. Along with its companion Gynaecology by Ten Teachers the book will continue to provide an accessible 'one stop shop' in obstetrics and gynaecology for a new generation of doctors.

This well-known and highly respected textbook has been rigorously revised and updated to reflect the changes in both midwifery education and practice.
