Change is at the core of human essence. The simplest definition of change is to make different. Human essence isn ' t so simple to define. Aristotle referred to it as to ti esti, " the what it is. " As such, change makes different what is. Many experts now assert the number one task of leaders is simply to manage change. Yet managing change is anything but simple. Leading change is even more difficult. Maximizing value in this environment requires leadership—and not yesterday ' s authoritarian style of leadership, but leadership at a higher level that connects with both the heart and the mind.

Bookshelves abound with theoretical analyses, how-to guides, and personal success stories by famous corporate leaders, public officials, even athletic coaches, expounding on how to lead from the top. But what about those in the middle who are increasingly tasked with trying to reshape, reorient, or recreate the capabilities of an organization? Leading Change from the Middle takes you on the journeys traveled by Kurt Mayer, an information technology executive in the Department of Defense trying to build a new IT system in record time with limited resources, and Stephen Wang, a mid-level leader in city government trying to build a capability for supporting commercial agriculture. Kurt and Stephen have to navigate complex organizational and stakeholder landscapes in which they often have few decision rights and few resources—a common scenario for mid-level leaders. One succeeds; one does not. While following Kurt and Stephen, the book introduces a new approach for increasing the likelihood of successfully leading change. This new approach breaks down into three core strategies: First, identify all relevant stakeholders and partition them into four categories: superordinates, subordinates, customers, and complementors/blockers (those who control needed resources but over whom the leaders have no authority). Second, for each stakeholder category, identify Communications, Strategies, and Tactics (referred to as CoSTS). Third, don ' t stimulate negative emotions that make people DEAF—Disrespect, Envy, Anger, and Fear—to efforts to produce change. As the book follows the journeys of Kurt and Stephen, it walks through the details of each strategy. In presenting this material in a concise, accessible, and applicable format that translates theory to practice, Nickerson provides an important service for leaders trying to build extraordinary capabilities for their organizations—from the middle.

This book proposes a bold new vision of leadership--one rooted in moral values and a consistent display of respect for all followers.

The challenge of transforming organizational culture is at the heart of many key movements in contemporary healthcare, and understanding culture change has become a core leadership competency. However, much current practice is based on antiquated and psychologically unsophisticated theories, leaving leaders inadequately prepared for the complex task of implementing change. Leading Change in Healthcare presents relationship-centered administration, an effective new evidence-based alternative to traditional culture change methodologies. It integrates fresh insights and methods from complexity science, positive psychology and relationship-centered care, enabling a more spontaneous and reflective approach to change management. This fosters greater organizational awareness and real participation, as well as improved productivity and creativity, as well as staff recruitment and retention. Case studies drawn from primary care, hospitals, long-term care, professional education, international NGOs and other settings, rather than emphasizing the end results, are demonstrations of how to apply relationship-centered administration in everyday practice. Leading Change in Healthcare is a key resource for all practitioners, students and teachers of healthcare management, medical educators, and leaders in all areas of healthcare provision.

In his international bestseller "Leading Change," Kotter provided an action plan for implementing successful transformations. Now, he shines the spotlight on the crucial first step in his framework: creating a sense of urgency by getting people to actually see and feel the need for change.
