Since Lightroom first launched, Scott Kelby's The Adobe Photoshop Lightroom Book for Digital Photographers has been the world's #1 best-selling Lightroom book (it has been translated into a dozen different languages), and in this latest version for Lightroom 4, Scott uses his same award-winning, step-by-step, plain-English style and layout to make learning Lightroom easy and fun. Scott doesn't just show you which sliders do what (every Lightroom book will do that). Instead, by using the following three simple, yet brilliant, techniques that make it just an incredible learning tool, this book shows you how to create your own photography workflow using Lightroom: Throughout the book, Scott shares his own personal settings and studio-tested techniques. Each year he trains thousands of Lightroom users at his "Lightroom Live!" tour and through that he's learned what really works, what doesn't, and he tells you flat out which techniques work best, which to avoid, and why. • The entire book is laid out in a real workflow order with everything step by step, so you can begin using Lightroom like a pro from the start. What really sets this book apart is the last chapter. This is where Scott dramatically answers his #1 most-asked Lightroom question, which is: "Exactly what order am I supposed to do things in, and where does Photoshop fit in?" You'll see Scott's entire start-to-finish Lightroom 4 workflow and learn how to incorporate it into your own workflow. Scott knows first-hand the challenges today's digital photographers are facing, and what they want to learn next to make their workflow faster, easier, and more fun. He has incorporated all of that into this major update for Lightroom 4. It's the first and only book to bring the whole process together in such a clear, concise, and visual way. Plus, the book includes a special chapter on integrating Adobe Photoshop seamlessly into your workflow, and you'll also learn some of Scott's latest Photoshop portrait retouching techniques and special effects, which take this book to a whole new level. There is no faster, more straight-to-the-point, or more fun way to learn Lightroom than with this groundbreaking book.

Combining the benefits of video training and book learning, Tony Northrup's Lightroom 5 Video Book gives you over 12 hours of video and 250 pages of written content. When you can set aside the time, start the videos on a smartphone, tablet, or PC, and work alongside Tony & Chelsea in Lightroom. When you'd rather learn away from your PC, or you just want to quickly look something up, search the eBook or flip through the paperback book to find the information you need. Similar video training costs well over \$120 or more, or worse, requires you to pay a monthly membership fee that might cost you thousands. Similar books cost over twice this amount. You also get over 150 Lightroom presets, which usually cost more than \$100, and access to our private Lightroom group on Facebook so you can ask questions and get feedback. Tony covers every aspect of Lightroom in-depth, but structures his teaching so that both beginner and advanced photographers can learn as efficiently as possible. If you just want a quick start, you can simply watch the first video or read the first chapter and you'll be organizing and editing your pictures in less than an hour. If you want to know more about a specific feature, switch to that video or flip to that chapter in the eBook. If you want to know everything about Lightroom, watch the videos and read the book from start-to-finish.
