It is only when research designs start with a more sophisticated view of the chain of “ variables ” linking leadership practices to student learning that the effects of leaders become evident. These linkages typically get longer the larger the organization.

~~Executive summary—How Leadership Influences Student Learning~~

This report, six years in the making, is the largest to date to confirm through quantitative data that effective school leadership is linked to student achievement. Teachers, principals, district leaders and state policymakers all affect student learning, it finds. But the study suggests that principals are also central figures in the effort.

~~Linking Leadership to Student Learning: Leithwood, Kenneth ...~~

"Leadership is second only to classroom instruction as an influence on student achievement. Strong leadership can potentially unleash latent capacities that already exist in an organization. The authors, after five years of research, could not find a single documented case of a school that managed to turn around its student achievement trajectory in the absence of talented leadership.
