Featuring recipes drawn from familiar classic dishes and new favorites, Laura Lea's new book, Simply Laura Lea, offers delicious home-cooked food without sacrificing healthy eating.

Time-series analysis is one of several branches of statistics whose practical importance has increased with the availability of powerful computing tools. Methodology originally developed for specialized applications, for example in business forecasting or geophysical signal processing, is now widely available in general statistical packages. These computing developments have helped to bring the subject closer to the mainstream of applied statistics. This book is an introductory account of time-series analysis, written from the perspective of an applied statistician with a particular interest in biological applications. Throughout, analyses of data-sets drawn from the biological and medical sciences are integrated with the methodological development. The book is unique in its emphasis on biological and medical applications of time-series analysis. Nevertheless, its methodological content is more widely applicable. It should be useful to both students and practitioners of applied statistics whatever their field of application, and to biologists whose work involves the analysis of time-series data. Book jacket.

Transmorphing Utopia is the first major publication on the astutely absurd work of artist Paul W. Wadell. This richly illustrated book includes essays by independent curator Santiago Vernetti and celebrated author Jonathan Griffin, as well as an exclusive interview between Waddell and the artist Chelsea Coon. The texts offer generous insights into the full scope and depth of Waddell's career across his varied mediums and disciplines. The full color reproductions bring together images from two seminal series of painting: LOOSE HEADS (paintings that look for you) and TRANSMORPHING. Vernetti's essay, which is chock-full of his characteristically refreshing wit, deftly situates these paintings within their appropriate art historical lineage while offering amusingly perceptive interpretations. Griffin's personal reflection untangles the various strands of Waddell's oeuvre, and considers what artistic personas the artist adopts when addressing his audience. The interview between Coon and Waddell, two of the most engaging and exciting figures in the contemporary art scene, lays bare the impulses and influences that drive and inform their performance practices. Despite its content and contributors, this publication just barely scratches the surface of one of Southern California's most intriguing artists, and will leave readers delightfully unquenched.

Retailers Choice Award winner, 2012 The world is on the brink of disaster, and the clock is ticking. Iran has just conducted its first atomic weapons test. Millions of Muslims around the world are convinced their messiah—known as the Twelfth Imam—has just arrived on earth. Israeli leaders fear Tehran, under the Twelfth Imam's spell, will soon launch a nuclear attack that could bring about a second Holocaust and the annihilation of Israel. The White House fears Jerusalem will strike first, launching a preemptive attack against Iran's nuclear facilities that could cause the entire Middle East to go up in flames, oil prices to skyrocket, and the global economy to collapse. With the stakes high and few viable options left, the president of the United States orders CIA operative David Shirazi and his team to track down and sabotage Iran's nuclear warheads before Iran or Israel can launch a devastating first strike.

THE ART. One of the most iconic artists of the 20th century, Frida Kahlo's bold, carefully crafted visual identity is in many respects an extension of her art, celebrating her Mexican heritage and countercultural ideals while defying traditional notions of female beauty. THE FINAL WORD. As William Morris said, Have nothing in your houses that you do not know to be useful, or believe to be beautiful.
