If you've ever wanted to reload ammunition but didn't know where to start this book is for you. You'll find detailed chapters about primers, cartridge cases, gun powder, and bullets, explaining in layman's terms what they are, variations you'll encounter and the characteristics of each. You'll also learn the different facets of case preparation: which are necessary and which are optional, and how to do them. You'll learn some characteristics of gunpowder and which types work best with bulk measurements. There'll be detailed photos and explanations teaching the process of reloading ammunition. From there you'll be shown how you can gear up to reload your own ammunition even if you don't have much money or space. Although most of the book is geared toward metallic cartridge reloading there's also a chapter on reloading shotgun ammunition. It too, will show you the steps involved and how to become operational with very little money and minimal space requirements. After reading this book the novice reloader will: (a) be capable of making informed choices when purchasing their equipment and components; (b) be able to understand the reloading process and why certain steps are taken or omitted; (c) have a safe, profitable

and enjoyable experience from the very beginning.

Learning how to reloading ammunition can be a daunting task. Technical manuals and books full of arcane data can make the subject mysterious and overwhelming. No more! The Practical Guide to Reloading Ammunition teaches the subject in a fun, easy-to-understand, and safe manner. Starting from the very beginning, The Practical Guide to Reloading Ammunition will help readers understand the gear they need - and what can wait. Chapter by chapter, the book explains the entire process from brass cleaning to final inspection. Loaded with pictures and illustrations, the process is made simple and clear. With this book, readers will be reloading their own cost-effective ammunition quickly and safely. The Practical Guide to Reloading ammunition focuses on the "how-to" aspects of reloading. Author Tom McHale explains. "Think of reloading manuals as sheet music. And this book as Mrs. Clutterbuck's piano lessons. If one develops a sudden urge to play Carnegie Hall, or even Bodean's Wet Whistle Bar and Bait Shop, they could just order sheet music from the Internet. But it probably wouldn't be the most direct path to ivory key success. Take some lessons first, then order the sheet music." Although the author believes reading this book will be a far more pleasant experience than weekly lessons in Mrs. Clutterbuck's den, the idea is the same. The guide will teach aspiring reloaders how to get started. Topics Include: * Why take up reloading? * Is reloading right for you? * What equipment do you need? * Cleaning and processing brass. * The reloading process: step by step. * Pistol caliber reloading. * Rifle caliber reloading. * Buying reloading components. * Advanced equipment options - how gear can speed up the process. * Introduction to advanced topics.

Indispensable information has been funnelled into a huge new edition, completely rewritten and refreshed by Sam Fadala. This textbook for black powder shooters is topped off by a catalog of all currently-manufactured work powder firearms. The ultimate source for black powder.

"A deeply meaningful collection that navigates important nuances of identity."—Kirkus Reviews, starred review Nepantla Familias brings together Mexican American narratives that explore and negotiate the many permutations of living in between different worlds—how the authors or their characters create, or fail to create, a cohesive identity amid the contradictions in their lives. Nepantla—or living in the in-between space of the borderland—is the focus of this anthology. The essays, poems, and short stories explore the in-between moments in Mexican American life—the family dynamics of living between traditional and contemporary worlds, between Spanish and English, between cultures with traditional and shifting identities. In times of change, family values are either adapted or discarded in the quest for self-discovery, part of the process of selecting and composing elements of a changing identity. Edited by award-winning writer and scholar Sergio Troncoso, this anthology includes works from familiar and acclaimed voices such as David Dorado Romo, Sandra Cisneros, Alex Espinoza, Reyna Grande, and Francisco Cantú, as well as from important new voices, such as Stephanie Li, David Dominguez, and ire'ne lara silva. These are writers who open and expose the in-between places: through or at borders; among the past, present, and future; from tradition to innovation; between languages; in gender; about the wounds of the past and the victories of the present; of life and death. Nepantla Familias shows the quintessential American experience that revives important foundational values through immigrants and the children of immigrants. Here readers will find a glimpse of contemporary Mexican American experience; here, also, readers will experience complexities of the geographic, linguistic, and cultural borders common to us all.

This publication is an informative guide book on reloading to include equipment and accessories used as tools of the trade. It also includes my extensive experiences as a reloader of approximately three hundred thousand rounds during the past thirty-five years. The book covers fourteen chapters with a major emphasis on Dillon reloading equipment and its many accessories. It does include discussions on other products from major manufacturers. Other chapters mention such subjects as reloading dies, primers, new pistol powders, reloading the 9mm, plated/coated/moly bullets, special topics, FAQs, and the Ruger American Pistol reviews with my experience loading for this firearm. This book is not an A to Z manual on how to begin reloading. It is a highly referenced publication that is written for all working reloaders who want to learn more usable info and wish to develop a lifelong hobbypractical volume reloading.
