Prior to WWII the American Fork and Hoe Company (AFH) was busy making some really great designs for fishing rod handles. American Fork and Hoe as you may or may not know was one of the companies responsible for making the 1905E and M1 bayonet.. This past weekend Kathleen and I decided it was time gear up to go fishing and what better way to do that than to pick up some old antique rods and reels.

structures. Fortress America surveys the broad sweep of fortifications throughout North America—from seacoast forts of the late eighteenth century to wooden inland forts built to defend against Native American, English, French, or Spanish attack; from Civil War-era coastal and inland waterways forts to the Great Plains' forts of the Old West; from World War II subterranean bunkers to Cold War concrete missile silos. The text of Fortress America is complemented with never-before-published photographs, and extraordinary drawings, cut-aways, and diagrams illustrating the design and structure of American forts.

Making War at Fort Hood offers an illuminating look at war through the daily lives of the people whose job it is to produce it. Kenneth MacLeish conducted a year of intensive fieldwork among soldiers and their families at and around the US Army's Fort Hood in central Texas. He shows how war's reach extends far beyond the battlefield into military communities where violence is as routine, boring, and normal as it is shocking and traumatic. Fort Hood is one of the largest military installations in the world, and many of the 55,000 personnel

based there have served multiple tours in Iraq and Afghanistan. MacLeish provides intimate portraits of Fort Hood's soldiers and those closest to them, drawing on numerous in-depth interviews and diverse ethnographic material. He explores the exceptional position that soldiers occupy in relation to violence--not only trained to fight and kill, but placed deliberately in harm's way and offered up to die. The death and destruction of war happen to soldiers on purpose. MacLeish interweaves gripping narrative with critical theory and anthropological analysis to vividly describe this unique condition of vulnerability. Along the way, he sheds new light on the dynamics of military family life, stereotypes of veterans, what it means for civilians to say "thank you" to soldiers, and other questions about the sometimes ordinary, sometimes agonizing labor of making war. Making War at Fort Hood is the first ethnography to examine the everyday lives of the soldiers, families, and communities who personally bear the burden of America's most recent wars.

Though primarily fought in the field, the American Revolution saw fortifications play an important part in some of the key campaigns of the war. Field fortifications were developed around major towns

Armed with incredible power and an array of technological and weaponry innovations, Fort Hancock protected New York Harbor from any mode of attack for almost 80 years. Named in 1895 after Civil War hero Gen. Winfield Scott Hancock, it sits on the northern tip of New Jersey's seashore on the Sandy Hook peninsula. The fort's evolution serves as a classic example of how the U.S. Army defended American harbors from the War of 1812 through most of the cold war era. It blazed the way in defending a prime U.S. harbor, while boasting impressive and unique architecture. Since 1975, Fort Hancock has been administered by the National Park Service and thousands of visitors delight in its history year round from sunrise to sunset.
