Why study Information Technology Management for Business at Alliance MBS? Developed in collaboration with leading global blue-chip employers, this course aims to create "the ideal graduate" whose skills cover the challenging middle ground between business and IT.

Information technology management (IT management) is the process whereby all resources related to information technology are managed according to an organization's priorities and needs. This includes tangible resources like networking hardware, computers and people, as well as intangible resources like software and data.

Information technology is a powerful tool in the rapidly developing world of business. It can help organisations stay one step ahead of the competition but this requires an understanding, not only of the systems but of the role these systems are projected to play within organisations and across wider society in the future.

Business strategy: Although a long way from the workaday issues of managing information in organisations, strategy in most organisations simply has to be informed by information technology and information systems opportunities, whether to address poor performance or to improve differentiation and competitiveness.

Business strategy - Wikipedia
In business, management information systems (or information management systems) are tools used to support processes, operations, intelligence, and IT. MIS tools move data and manage information. They are the core of the information management discipline and are often considered the first systems of the information age.

The Information Technology Management for Business Degree is home to future leaders of the IT industry. Together with your outstanding fellow students from around the world, you will learn the application of technology within the modern workplace across diverse industries.
