Math Journal Prompts & Ideas | Study.com

The value of math journals is highly dependent upon the kinds of prompts you select. After many failed attempts at trying to explain these types of prompts and discuss their pros and cons, I decided to put the information into a table for easier navigation. (Click on the image below to view as a PDF) I use open-ended prompts in my own classroom. The most important piece to remember is that ...

Why You Need to be Using Math Journal Prompts in Your ...

Math journal sharing can be done whole class in the beginning of the year (walk around as students write and take note of any exceptional or thought-provoking responses, and ask those students to share with the group afterward). This is a great opportunity for you to encourage reflective thinking and reinforce your journaling expectations.

Everything You Need to Know About Math Journals

A journal should be written at the end of a math exercise. Journal entries should be in a separate book, one used specifically for mathematical thinking. Math journals should contain specific details about the areas of difficulties and areas of success. The math journal entries should take no more than 5-7 minutes.

Math Journals

Interactive Notebooks: Math for grade 6 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about absolute value, ratios, evaluating expressions, one-variable equations and inequalities, surface area, and more! --This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. --Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

The Everyday Mathematics (EM) program was developed by the University of Chicago School Mathematics Project (UCSMP) and is now used in more than 185,000 classrooms by almost three million students. Its research-based learning delivers the kinds of results that all school districts aspire to. Yet despite that tremendous success, EM often leaves parents perplexed. Learning is accomplished not through rote memorization, but by actually engaging in real-life math tasks. The curriculum isn't linear, but rather spirals back and forth, weaving concepts in and out of lessons that build overall understanding and long-term retention. It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain. Now help is here. Inspired by UCSMP's firsthand experiences with parents and teachers, Everyday Mathematics for Parents will equip parents with an understanding of EM and enable them to help their children with homework—the heart of the great parental adventure of ensuring that children become mathematically proficient. Featuring accessible explanations of the research-based philosophy and design of the program, and insights into the strengths of EM, this little book provides the big-picture information that parents need. Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM. Detailed guidance for assisting students with homework includes explanations of the key EM concepts that underlie each assignment. Resources for helping students practice math more at home also provide an understanding of the long-term utility of EM. Easy to use, yet jam-packed with knowledge and helpful tips, Everyday Mathematics for Parents will become a pocket mentor to parents and teachers new to EM who are ready to step up and help children succeed. With this book in hand, you'll finally understand that while this may not be the way that you learned math, it's actually much better.

The 6th Grade Math 400-page blank notebook and journal is ideal for students of 6th grade math to record study and lecture notes.

This is a math journal and workbook for 6th grade students created by a math teacher with students in mind.
