School-Based Consultation and Students with Autism Spectrum Disorder examines the preventive and remedial powers of consultation for indirectly supporting the needs of youth with Autism Spectrum Disorder (ASD), through collaborating with their parents and educators. Given the unprecedented numbers of students with ASD in schools, and the variety of evidence-based interventions currently available, consultation helps ensure appropriate service delivery across the range of student functioning. Focusing on foundational knowledge and skills that school consultants need to incorporate ASD service delivery into their research and practice, this text addresses consistent and effective service delivery for students with ASD to optimize their positive academic, behavioral, adaptive, and social communicative outcomes. Highlighting relevant cross-cultural research throughout its chapters, the book concludes with a section on future directions in the field that includes areas for improvement in meeting the needs of diverse students, families, and schools.

In a large-size format for easy photocopying, this user-friendly manual presents a tested treatment protocol for children and adolescents (ages 6 to 18) struggling with obsessive-compulsive disorder (OCD). Ten flexible modules give clinicians tools for engaging kids and their parents and implementing successful exposure and response prevention activities, as well as other cognitive-behavioral therapy (CBT) strategies. Each module includes vivid clinical vignettes, sample scripts, "tips and tricks" drawn from the authors' extensive experience, and numerous reproducible child and parent handouts and worksheets. Purchasers get access to a Web page where they can download and print additional copies of the reproducible materials, in color.
