Get Free Mechanical Ventilation For Cooking Equipment

Kitchen Ventilation & Extraction Systems We're highly experienced in the specification, design and manufacture of ventilation and extraction canopies for kitchens of any size. Air control systems, wall cladding and infills as well as fans and ductwork with built in fire suppression systems can also be built to specification.

Kitchen & Catering Ventilation Extraction Systems ...

In a commercial kitchen, air change is normally supplied by a mechanical ventilation system. This is most often by means of an extract canopy, situated above the appliances to remove the by-products of the cooking process. Sufficient outdoor air must be provided through supply fans, or by natural ventilation, in order to replace the extracted air.
