Public Health and Medical Anthropology | Anthropology 204

My main interest within medical anthropology is understanding health disparities. Medical anthropology allows me to take a holistic approach, something that I believe public health lacks, to analyze why certain populations have limited access to health care, nutrition, clean water, proper housing, education, etc. Additionally, it allows me to use a critical lens to examine power structures that affect health care access. In addition to medical anthropology, I am also interested in ...

An Introduction to Medical Anthropology - ThoughtCo

A deeper and more comprehensive understanding of the context and ultimate causes of public health problems requires an ability to bridge disciplinary boundaries, and to conceptualize comprehensive models of global health dynamics. Professional training in both public health and anthropology is viewed as one small but crucial step toward this goal.

MPH/PhD Program | Department of Anthropology | University ...

Medical anthropology is the study of how health and illness are shaped, experienced, and understood in light of global, historical, and political forces.

Medical Anthropology | Department of Anthropology

As part of this enterprise, medical anthropology includes, among other things, the study of health disorders that may be self-defined or community-defined, including those not validated as “ real ” by biomedical epistemology. This often raises questions about biomedicine ’ s claim to ultimate authority on the nature of disease.
