Over the past decade the European Union (EU) has gradually developed the European Neighbourhood Policy (ENP) with its neighbours. At the same time, the 'neighbours of the EU's neighbours' have presented new challenges. This book addresses the EU's broader neighbourhood,

comprising of the ENP countries and the neighbours of its neighbours. With specific focus on Saharan Africa, the Middle East and Central Asia, it discusses trans-regional policy issues that arise from the EU's relations with regions beyond the ENP. Based on an interdisciplinary, policy-oriented approach, this volume explores major political, legal, security and socio-economic challenges and identifies opportunities for cooperation across the EU's broader neighbourhood. This book will be of interest to students, experts and scholars interested in EU affairs and politics, international relations, EU and international law, diplomacy and area studies.

Multilingual Philippines. Unlike most studies on languages in education, which take a neutral, de-contextualized stance, this volume take a pluricentric view of the English language by positioning it in relation to its varieties, as well as to other languages in the country. Because of the changing realities of English in the Philippines, traditional assumptions about the language as monolithic and unchanging, as well as about how it should be taught and learned, need to be revisited and re-conceptualized.

Public debates about the terms of membership and inclusion have intensified as developed economies increasingly rely on temporary migrant labour. While most agree that temporary migrant workers are entitled to the general protection of

employment laws, temporary migrants have, by definition, restricted rights to residence, full social protections and often to occupational and geographic mobility. This book raises important ethical questions about the differential treatment of temporary and unauthorised migrant workers, and permanent residents, and where the line should be drawn between exploitation and legitimate employment. Taking the regulatory reforms of Australia as a key case study, Laurie Berg explores how the influence of immigration law extends beyond its functions in regulating admission to and exclusion from a country. Berg examines the ways in which immigration law and enforcement reconfigure the relationships between migrant workers and employers, producing uncertain

and coercive working conditions. In presenting an analytical approach to issues of temporary labour migration, the book develops a unique theoretical framework, contending that the concept of precariousness is a more fruitful way than equality or vulnerability to evaluate and address issues of temporary migrant labour. The book will be of great interest to scholars and practitioners of immigration law and employment law and policy.

This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of

values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is communicated to the prospective buyer and discusses

misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel.

states that have signed various forms of association agreement with it. This book asks whether qualifying states who have eschewed EU membership experience negative effects on their legal and political self-governing abilities, or whether they manage their independence with few such effects. It explores the idea that the closer the affiliation a non-member state has with the EU, the more susceptible to hegemony the relationship appears to be. In addition, the book provides an overview of the total range of agreements the EU has with non-member states. This text will be of key interest to scholars and students of in EU/European studies, Scandinavian studies, European and comparative politics, international relations, and democratization studies.

"The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots' historical skillsets, such as superb hand-eye coordination--required for aggressive stick-and-rudder maneuvering--and perfect eyesight and crack marksmanship--required for long-

range visual detection and destruction of the enemy. Highly automated systems would, proponents argued, simplify the pilot's tasks while increasing his lethality in the air, thereby opening fighter aviation to broader segments of the population. However, these new systems often required new, unique skills, which the pilots struggled to identify and develop. Moreover, the challenges that accompanied these technologies were not restricted to individual fighter cockpits, but rather extended across the pilots' tactical formations, altering the social norms that had governed the fighter pilot profession since its establishment. In the end, the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior, despite the precepts embedded within the "myth

of the fighter pilot." As such, this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace. It is broadly applicable to other enterprises confronting increased automation, from remotely piloted aviation to Google cars. It should appeal to those interested in the history of technology and automation, as well as the general population of military aviation enthusiasts."--Provided by publisher.

source material arising from fieldwork conducted in a number of jurisdictions. The research data includes, for example, an extensive series of documents obtained under a number of Freedom of Information applications, in-depth interviews with key actors from pertinent legislatures, governments, regulatory offices, interest groups and civic society. The linguistic coverage of source material includes English and Welsh, as well as, where relevant, Irish, German, Catalan, Spanish, French and Basque, in a publication which is multi-disciplinary in approach, engaging with the scholarly and professional literature in language policy and planning, socio-legal studies and the politics of language.
