The recovery of Mercedes-Benz in the early post-war years was remarkable and its first prestige model was the 300 saloon. Using this car's engine, transmission and suspension, Mercedes-Benz entered sports car racing. It proved successful, winning the 1952 Le Mans 24-hour race, the Carrera PanAmericana and many other events. The production model made its sensational debut in 1954. 1,400 Gullwing coupes were built between 1954 and 1957. The contents of this book provide a glorious review of these historic Mercedes-Benz sports cars.

The 300SL, the 190SL and the pagoda SL were already legends, when still in production. That has not changed till today. Names like "Gullwing" or "Pagoda" are forever associated with the SL name. Both cars are the foundation on which every new SL still rests today. And the SLK traces its roots back to the 190SL, the car that convinced management in the 1950s that the SL story was worth to be developed further. This reference book covers the complete history of all three versions, discusses a one of a kind 300SL roadster and comes with recent non-Daimler AG color photography. If you want to know more about these iconic Mercedes cars, then this book is for you. FREE BONUS: When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W108 or W198 or R107 for example) the author has covered in one of his books. Koehling's books about Mercedes cars of the 1950s and 1960s. It was suggested to have them covered in a separate book to accompany the other SL book of Bernd S. Koehling: MERCEDES-BENZ, The modern SL, available also here on Amazon.

Cuba's Car Culture drives through Cuba's love of American cars of the '40s and '50s, and the ingenuity that keeps them running despite the U.S. embargo. 2017 Silver Medal Winner of the International Automotive Media Competition! The story of how Cuba came to be trapped in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular culture, one marked by great creativity, such as: -Keeping a car alive with no opportunity to acquire replacement parts -Customizing a car with no access to aftermarket parts -Drag racing with no drag strip In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have been cut off from the world so long that they've morphed into something else in the spirit of automotive survival. Authors Tom Cotter and Bill Warner (founder of the Amelia Island Concours) take readers on a whirlwind tour of all things automotive, beginning with Cuba's pre-Castro car and racing history, up to today's lost collector cars, street racing, and the challenges of keeping decades-old cars on the road. Cuba's Car Culture is illustrated throughout with rare historical photos as well as contemporary photos of Cuba's current car scene. For anyone who enjoys classic cars, whether they're old Chevy Bel-Airs, Studebakers, or Ford Fairlanes, a cruise around Cuba will make you feel like a kid in a candy store.
