ASP.NET MVC (Model View Framework) allows you to use ready-to-use MVC code so you can develop Web applications faster. This book's cut-to-the-chase approach gets you up to speed on the new ASP.NET MVC without getting bogging you down in learning or re-learning ASP.NET itself. You'll receive straightforward instruction on concepts, backed by real-world case studies and examples that offer practical solutions. Topics include test-driven development and unit testing, the principles of the MVC pattern, how to implement it, how to move from traditional ASP.NET Webforms to ASP.NET MVC, and much more.

The Age of Ideation describes and outlines and introduces a modeling paradigm and science for changing possibilities and relationships. It outlines and provides the models to describe and measure the outcomes of Human Ideation and interactions. This is another groundbreaking title from Dr. Robert Carkhuff.

Current Directions in Postal Reform brings together leading practitioners, worldwide postal administrations, and the courier industry as well as a number of regulators, academic economists, mailers and lawyers, to examine some of the major policy and regulatory issues facing the postal and delivery industry. Issues addressed include international postal policy; the universal service obligation; regulation; competition, entry, and the role of scale and scope economies; the nature and role of cost analysis in the postal service; productivity; interaction of law and economics; and service standards.

This volume explores the potential of employing a relational paradigm for the purposes of interdisciplinary exchange. Bringing together scholars from the social sciences, philosophy and theology, it seeks to bridge the gap between subject areas by focusing on real phenomena. Although these phenomena are studied by different disciplines, the editors demonstrate that it is also possible to study them from a common relational perspective that connects the different languages, theories and perspectives which characterize each discipline, by going beyond their differences to the core of reality itself. As an experimental collection that highlights the potential that exists for cross-disciplinary work, this volume will appeal to scholars across a range of field concerned with critical realist approaches to research, collaborative work across subjects and the manner in which disciplines can offer one another new insights.

Thirty years after the accidental death of her husband, Vivvie is given custody of her two grandchildren and her two estranged daughters come to live with her, as each member of the family tries to come to terms with the past.

The Abhidharma is a collection of Buddhist scriptures that investigate the workings of the mind and the states of human consciousness. In this book, Chögyam Trungpa shows how an examination of the formation of the ego provides us with an

opportunity to develop real intelligence. Trungpa also presents the practice of meditation as the means that enables us to see our psychological situation clearly and directly.

A classic for more than 20 years, this thought-provoking volume explores the role of Jewish women in the synagogue, in the family, and in the secular world. Greenberg offers ways to change present Jewish practices so that they more readily reflect feminine equality.

This book is the follow-up to Thierry Groensteen's groundbreaking *The System of Comics*, in which the leading French-language comics theorist set out to investigate how the medium functions, introducing the principle of iconic solidarity, and showing the systems that underlie the articulation between panels at three levels: page layout, linear sequence, and nonsequential links woven through the comic book as a whole. He now develops that analysis further, using examples from a very wide range of comics, including the work of American artists such as Chris Ware and Robert Crumb. He tests out his theoretical framework by bringing it up against cases that challenge it, such as abstract comics, digital comics and shojo manga, and offers insightful reflections on these innovations. In addition, he includes lengthy chapters on three areas not covered in the first book. First, he explores the role of the narrator, both verbal and visual, and the particular issues that arise out of narration in autobiographical comics. Second, Groensteen tackles the question of rhythm in comics, and the skill demonstrated by virtuoso artists in intertwining different rhythms over and above the basic beat provided by the discontinuity of the panels. And third he resets the relationship of comics to contemporary art, conditioned by cultural history and aesthetic traditions but evolving recently as comics artists move onto avant-garde terrain.
