First Book is a nonprofit social enterprise that provides new books, learning materials, and other essentials to children in need. Since our founding in 1992, First Book has distributed more than 175 million books and educational resources to programs and schools serving children from low-income families.

### First Book

I got this book for my 7 year old nephew. He is in first grade and really likes the science class he has at school. I like that this book covers different types of science and can get other books about topics he is interested in. He will need help reading some of the words but I know he will like the simple experiments in the book.

In the final part of a three-book series, Ellie the Electron adventures into the subatomic world. Simple rhyming sentences and vibrant science pictures make it easy for even a toddler to begin to understand the basics of chemistry. Learn about some of the most fundamental concepts in science BEFORE the social pressure and intimidation of formal schooling sets in. Spark scientific curiosity in kids of all ages!--En la última parte de la serie de tres libros, Ellie el Electrón se aventura en el mundo subatómico. Oraciones simples con rimas e imágenes científicas con colores vibrantes hacen que sea fácil incluso para los niños pequeños empezar a entender los aspectos básicos de la química. Aprenda sobre algunos de los conceptos más fundamentales en las ciencias ANTES de que se presente la presión social y la intimidación del aprendizaje formal. ¡Despierte la curiosidad científica en los niños de todas las edades!

How does the brain control the rest of the body? How does it enable the senses, regulate speech, affect balance, and influence sleep and dreams? These 30 full-page illustrations to color help explain every aspect of the brain's big job, from communicating with the central nervous system to retaining memories.

Learn about magnetism with a magnet maze, discover how tall you are using your own feet, and find out about color mixing with jelly! Jam-packed with fun and exciting experiments, which can easily be performed at home, this book is the perfect introduction to science for inquisitive readers age 5 and up. The book attempts to reinforce school learning the experiments tie in with areas of science that children will be encountering in the classroom for the first time. Children will love the book because it is hands-on and entertaining, and parents will love the book, too, because of its educational value. All of the experiments can be safely performed with readily available household items. Because of the fun and appealing design, kids will want to dive in straight away!"

This fun and friendly book mixes early learning and fun activities. It's the perfect introduction to science for young children. The simple, easy-to-understand puzzles and games build on basic skills to introduce the ideas of temperature, light and sound, forces, living things and measuring in an accessible way. Perfect for children aged 4+.

Physics is fun! It's all about pushing and pulling, running and jumping, rainbows and rockets — it's even about sports! Physics involves the sun and the moon and all the things around you, including how you use energy and how animals and plants do, too. This is the book you'll want to use to discover fascinating facts about gravity, light, heat, sound, and other wonders such as thunder and lightning and volcanoes. Find out how things move, how you see and hear, what electricity is, and what's inside an atom. These 46 detailed, full-page illustrations with easy-to-understand captions will introduce you to the most basic concepts of physics, using memorable examples drawn from nature.

Where do we live among the galaxies, what did people think before they could study the sky with telescopes, and what happened to Pluto? Thirty-nine illustrations to color answer these and other questions about our Solar System and beyond. Entertaining, easy-to-understand captions explain crater formation, constellations, weightlessness, space junk, and other fascinating subjects. Suitable for ages 8–12.

Chris Ferrie fans will love this perfect educational art book for babies and toddlers featuring essential STEAM words from the #1 Science author! Babies and toddlers are curious and ready to learn! Introduce them to art words that go beyond the basics with this first 100 words baby board book. From painting to photography, from music to theater, from literature to history and more, this is the bright and simple introduction to the smart words every budding scholar needs! Surprise your special little one at birthdays, baby showers, holidays, and beyond with the amazing opportunity to discover with this baby and toddler learning book! My First 100 Art Words makes a wonderful addition to many other gifts you may be searching for, such as baby first birthday gifts for girls and boys, early development toys for babies, baby learning games, gift sets for babies and toddlers, and more!

With 46 illustrations and easy-to-read captions, this book explains what genes control and how they are passed along from one generation to the next. Perfect for ages 8 and up.

Your brain uses our five senses — sight, hearing, smell, taste, and touch — to figure out what's going on in the world around you. This book shows how your senses work by combining easy-to-understand explanations with detailed illustrations for you to color. You'll also find out about similarities and differences between human and animal sensory perception. Discover the nervous system, the pathway of sensory information, and how neurons receive and send data. Read about synesthesia, an extreme form of perception that enables people to hear sounds in response to smell, feel something in response to sight, and experience other unusual sensory combinations. Learn about special animal senses that detect heat, provide night vision, and alert birds, fish, and mammals to when it's time to migrate. These and other fascinating aspects of the senses are described and illustrated with 46 full-page illustrations to color.
