Buy any Nikon flash (Speedlight) made in the last 15 years with a TTL setting and it will work perfectly with any modern or old Nikon film camera. The only real difference between flashes is how far away you can get and still have enough light. Honest, all the other features are meaningless for practical photography.

Nikon Flash Guide - Ken Rockwell

The flash guide number (GN) is a measure of the distance at which the flash can illuminate a subject. The higher the guide number, the greater the distance at which the light from the flash is sufficient for optimal exposure. The formula for calculating the guide number is as follows: Guide number (GN)=distance (meters) × aperture (f-number)

The flash has a 197-foot guide number and a zoom range of 14-200mm. The Goddox flash still supports Nikon's TTL system and even high-speed sync, as well as a manual flash from 1/128 to 1/1. The recycle time is a quick.1 to 2.6 seconds and the duration sits between 1/300 and 1/20000 seconds. The hot shoe flash has a swivel and tilt bounce head.

Best Flash for Nikon DSLR Cameras in 2020

Guide to Nikon TTL Flashes Photography is about creating images with light. For indoor, night, fill light, or certain special effects, using electronic flashes to generate light becomes an important component in modern photography. Nikon's current flash technology is called i- TTL, and they offer five different external flash options.

Guide to Nikon TTL Flashes - Photo.net - Articles

The Nikon guide number charts in the user manuals show these GN specifications. Guide Numbers allow these simplifications to compare exposures (here, for GN / 10 feet, and GN / f4), at full power level, same zoom and same ISO. These are two arbitrary situations, and then we better know how to compare power of two flashes.

Compare Power Rating of Camera Flashes with Guide Numbers

Strap on that speedlight and follow me!! Step 1: Put your Camera in Manual Mode I find that when using flash the camera can often get confused with the exposure... Step 2: Set your Aperture to f8 As a starting point, f8 is always a good aperture to select to begin with. It means you... Step 3: Set ...

Nikon Flash for Z Cameras Nikon claims that the Z cameras are all CLS (Creative Lighting System) compatible. CLS is also known as i-TTL, and was Nikon's second attempt at a "digital compatible" flash system. While what Nikon suggests about compatibility is basically true, some wrinkles are present that you need to know about.

Nikon Flash for Z Cameras | Thom Hogan

The Bolt VX-710N TTL Flash is a dedicated flash for use with Nikon mirrorless cameras. It features a guide number of 164′ at ISO 100 and an adjustable tilt head with six positions: -7 to 90°. The -7° downward tilt allows you to fully illuminate your subject when shooting close-up.

Nikon manufactures some of the most sophisticated accessory flash equipment found in today's marketplace, and the Magic Lantern Guide shows photographers exactly how to master the complex equipment and operating modes of the company's AF Speedlight Flash System. That's why it's destined to be the most often used reference on photographic flash technique. From advice on Multi-sensor balanced fill flash, bounce flash, rear-curtain sync to high-speed sync, or multiple flash set-ups, this manual explains everything. It comes complete with a course on the basics of flash handling, specialized flash technique, and a model-by-model review of using current flash gear with Nikon cameras.

Debunking the common misconception that a flash is only necessary in low-light situations, this DVD guide provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more dynamic and visually interesting. Beginning with an introduction to the basic characteristics of light—the quality and diffusion of light, the direction of the light, and the color of the light—it goes on to discuss aperture, shutter speed, and ISO and their relation to Nikon flash systems. After teaching how to master these fundamentals, the DVD discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations.

Presents tips and techniques on creating lighting patterns using the Nikon creative lighting system.

This guide opens with in-camera flash basics, then moves to topics such asxposure flash readings, detachable units, flash guide numbers, bounce flash,nd fill flash, then covers advanced methods for using off-camera flash,lash brackets, power packs, remote triggering, and other techniques.
