The flash guide number (GN) is a measure of the distance at which the flash can illuminate a subject. The higher the guide number, the greater the distance at which the light

is sufficient
for optimal

exposure. The
formula for
calculating the
guide number is
as follows:

Guide number

Flash Level (Guide Number) - Nikon | Imaging Products

The Nikon guide number charts in the user manuals show these GN specifications. Guide Numbers allow these simplifications to compare exposures (here,

power level,

same zoom and

same ISO. These

are two
