Here he explores the nature of motivation, individual needs and how they relate to the key tasks facing leaders and managers - good, positive motivation can create, maintain and improve the performance of any team. In Leadership and Motivation John Adair also puts forward his own theory of motivation - the fifty-fifty rule - and then identifies the eight key principles for motivating others. Motivation increases efficiency and productivity - and makes reaching targets more likely. The reason is AI has been around since 1956, and its relevance is evident in every field today. Artificial Intelligence incorporates human intelligence into machines. Machine Learning (ML), a branch of AI, enables machines to learn by themselves. Deep Learning (DL), a subfield of Machine Learning, uses algorithms that are inspired by the functioning of the human brain. Natural Language Processing (NLP) combines computational linguistics and Artificial Intelligence, enabling computers and humans to communicate seamlessly. And NLP is immensely powerful and impactful as every business is looking to integrate it into their day to day dealings. How Is This Book Different? This book by AI Publishing is carefully crafted,

This book is your crash course in education from a professional teacher's / tennis pro's standpoint. It's a boiled down synopsis of my 4-year college courses from one of the highest regarded teacher's colleges in the U.S. which is Illinois State University, where I was on the varsity tennis team. While there I learned the fundamentals of how people learn, and of course several teaching methods that have been proven to get the best results of learning from the most people. Most tennis instructors have never taken a course in HOW to teach and I watch them commit all of the mistakes that someone would make in trying to teach the game of tennis, without having that education background. I've been using these methods for 25 years and refined them to a science that really works. Since I am a NLP
