This set of standards-based reproducible activity pages is basic, not boring. In this book, students tour the American government and economy with a sassy American eagle named Egbert. They'll review important facts about the structure of the government, the workings of the economy, and the rights and responsibility of citizens. An assessment, glossary, and helpful lists are included.

Like your own personal survival guide, *Help IOCOM Teaching Middle School Science* is a nontechnical how-to manual especially for first-year teachers. But even veteran teachers can benefit from the plentiful ideas, examples, and tips on teaching science the way middle-schoolers learn best. The book covers all the basics: what to do on the first day of school (including icebreaker activities); preparing safe and effective lab lessons; managing the classroom; working with in-school teams as well as parents. But its practical and encouraging approach doesn't mean it shortchanges the basics of effective pedagogy. You'll learn: how to handle cooperative learning and assessment; how to help students write effectively and; the importance of modeling for early adolescents."
