and ask for the number of positive integer solutions to the equation  $m + m + \dots + m = n$ : (1.1) Let us imagine  $k + n$  dots in a row. Each solution to the equation (1.1) corresponds to a way of separating the dots by inserting  $n - 1$  bars at certain places (Figure 1.1). Since there are  $n + k - 1$  positions for the bars, one has  $\binom{n+k-1}{n-1} = \binom{n+k-1}{k}$ .
