Dion Fortune encoded much practical magical lore within her novels, leaving it up to the reader to work out how to make use of it. Behind the novels were two major rituals, the Rite of Isis and the Rite of Pan, which Dion Fortune occasionally performed in public in the 1930s as part of her drive to open up occultism beyond the closed walls of esoteric fraternities. Now for the first time, these important magical workings have been released from her society's archive in their complete and original form. Edited and explained by Gareth Knight, this book contains the full text of the original Rite of Isis and Rite of Pan which formed the basis for Dion Fortune's Moon Magic, The Goat-Foot God, and The Sea Priestess. Further archive material elucidates the practical magical principles found in The Winged Bull. The book is supplemented by several articles written by Dion Fortune in the 1930s which shed further light on the practical content of her novels, including the essay Ceremonial Magic Unveiled, a review of the work of Israel Regardie in which she gives her views on the controversies within the Golden Dawn and frankly describes her own falling out with Moira MacGregor Mathers.

A much-needed contribution to the expanding interest in the history of travel and travel writing, Voyages and Visions is the first attempt to sketch a cultural history of travel from the sixteenth century to the present day. The essays address the theme of travel as a historical, literary and imaginative process, focusing on significant episodes and encounters in world history. The contributors to this collection include historians of art and of science, anthropologists, literary critics and mainstream cultural historians. Their essays encompass a challenging range of subjects, including the explorations of South America, India and Mexico; mountaineering in the Himalayas; space travel; science fiction; and American post-war travel fiction. Voyages and Visions is truly interdisciplinary, and essential reading for anyone interested in travel writing. With essays by Kasia Boddy, Michael Bravo, Peter Burke, Melissa Calaresu, Jesus Maria Carrillo Castillo, Peter Hansen, Edward James, Nigel Leask, Joan-Pau Rubies and Mes Williams.

Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (Cannabis sativa). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass-the list is endless. Formally christened Cannabis sativa in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.

Born and raised in Massachusetts, her family's home since the 1630s, Hannah Howell is the author of over thirty Zebra historical romances. Her love of history prompts the choice of venue, and also her dragging her husband Stephen, to every historical site she can get to. Her fascination with the past makes research as much a pleasure as a necessity. It was a thrill for her to turn her love of history and writing into a career, one that allows her to share those loves with others.

Laura Scott outlines a variety of craft ideas for all occasions and seasons to be sold at craft fairs or bazaars.

Oceanography and Marine Biology preserves the basic elements of the physical, chemical, and geological aspects of the marine sciences, and merges those fundamentals into a broader framework of marine biology and ecology. I have found that this approach works: my class of 350 students fills every semester it is offered, with students on waiting lists to get in. But existing textbooks on oceanography or marine biology address the companion field only cursorily: very few pages in oceanography texts are devoted to marine biology, and vice versa. This new book overcomes that imbalance, bringing these disparate marine science text formats closer together, giving them more equal weight, and introducing more effectively the physical sciences by showing students with everyday examples how such concepts form the foundation upon which to build a better understanding of the marine environment in a changing world.

The only guide written exclusively for this specialized market, this title provides the most up-to-date marketing resource information available to beginning and advanced writers, freelancers, editors, publishers, publicists, and all others interested in, or involved with, writing.

Provides an account of how, shortly before World War II, a heroic Naval officer named Swede Momsen led the efforts to save thirty-three men trapped in a sunken submarine.
