"The drawings aren't very good, Mama." -- Crappy Boy, age 5 Of course you love being a parent. But sometimes, it just sucks. I know. I'm Amber Dusick and I started my blog Parenting: Illustrated with Crappy Pictures because I needed a place to vent about the funny (and frustrating) day-to-day things that happened to me as a parent. Turns out, poop is hilarious! At least when you're not the one wiping it up. This book won't make your frustrating moments any less crappy. But these stories about my Crappy Baby, Crappy Boy and my husband, Crappy Papa, will hopefully make you laugh. Because you're not alone. And sometimes the crappiest moments make the best memories. Parenting is wonderful! And also, well, you know.

The ultimate recipe resource: an indispensable treasury of more than 2,000 foolproof recipes and 150 test kitchen discoveries from the pages of Cook's Illustrated magazine. There is a lot to know about cooking, more than can be learned in a lifetime, and for the last 20 years we have been eager to share our discoveries with you, our friends and readers. The Cook's Illustrated Cookbook represents the fruit of that labor. It contains 2,000 recipes, representing almost our entire repertoire. Looking back over this work as we edited this volume, we were reminded of some of our greatest hits, from Foolproof Pie Dough (we add vodka for an easy-to-roll-out but flaky crust), innumerable recipes based on brining and salting meats (our Brined Thanksgiving Turkey in 1993 launched a nationwide trend), Slow-Roasted Beef (we salt a roast a day in advance and then use a very low oven to promote a tender, juicy result), Poached Salmon (a very shallow poaching liquid steams the fish instead of simmering it in water and robbing it of flavor), and the Ultimate Chocolate Chip Cookies (we brown the butter for better flavor). Our editors handpicked more than 2,000 recipes from the pages of the magazine to form this wide-ranging compendium of our greatest hits. More than just a great collection of foolproof recipes, The Cook's Illustrated Cookbook is also an authoritative cooking reference with clear hand-drawn illustrations for preparing the perfect omelet, carving a turkey, removing meat from lobsters, freezing a layer cake, shaping sandwich bread, and more. 150 test kitchen tips throughout the book solve real home-cooking problems such as how to revive tired herbs, why you shouldn't buy trimmed leeks, what you need to know about freezing and thawing chicken, when to rinse rice, and the best method for seasoning cast-iron (you can even run it through the dishwasher). An essential collection for fans of Cook's Illustrated (and any discerning cook), The Cook's Illustrated Cookbook will keep you cooking for a lifetime - and guarantees impeccable results.

Some investigators have hypothesized that estrogens and other hormonally active agents found in the environment might be involved in breast cancer increases and sperm count declines in humans as well as deformities and reproductive problems seen in wildlife. This book looks in detail at the science behind the ominous prospect of "estrogen mimics" threatening health and well-being, from the level of ecosystems and populations to individual people and animals. The committee identifies research needs and offers specific recommendations to decisionmakers. This authoritative volume: Critically evaluates the literature on hormonally active agents in the environment and identifies known and suspected toxicologic mechanisms and effects of fish, wildlife, and humans. Examines whether and how exposure to hormonally active agents occurs—in diet, in pharmaceuticals, from industrial releases into the environment—and why the debate centers on estrogens. Identifies significant uncertainties, limitations of knowledge, and weaknesses in the scientific literature. The book presents a wealth of information and investigates a wide range of examples across the spectrum of life that might be related to these agents.
