It is an epic tale and Giles Tremlett's The International Brigades nails it with the decisiveness of a political commissar's bullet to the back of a deserter's head. Using widely trawled research, he has created an electrifying narrative that brings to life the idealism, suffering, chaos and paranoia of what a journalist at the time called the "most truly international army the world has seen ...

An international literary phenomenon, The Elementary Particles is a frighteningly original novel-part Marguerite Duras and part Bret Easton Ellis-that leaps headlong into the malaise of contemporary existence. Bruno and Michel are half-brothers abandoned by their mother, an unabashed devotee of the drugged-out free-love world of the sixties. Bruno, the older, has become a raucously promiscuous ...

Paper airplanes as serious science? No longer shamefully relegated to the back rows of elementary-school sports stadiums, paper airplanes come into their own with this amusing -- and instructive -- book. The Great International Paper Airplane Book documents the proceedings of the first (and possibly only) International Paper Airplane Competition conducted by Scientific American. In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to paper airplane enthusiasts and would-be aviators of every age.

From the Booker Prize-winning author of The Remains of the Day and When We Were Orphans, comes an unforgettable edge-of-your-seat mystery that is at once heartbreakingly tender and morally courageous about what it means to be human. Hailsham seems like a pleasant English boarding school, far from the influences of the city. Its students are well tended and supported, trained in art and literature, and become just the sort of people the world wants them to be. But, curiously, they are taught nothing of the outside world and are allowed little contact with it. Within the grounds of Hailsham, Kathy grows from schoolgirl to young woman, but it 's only when she and her friends Ruth and Tommy leave the safe grounds of the school (as they always knew they would) that they realize the full truth of what Hailsham is. Never Let Me Go breaks through the boundaries of the literary novel. It is a gripping mystery, a beautiful love story, and also a scathing critique of human arrogance and a moral examination of how we treat the vulnerable and different in our society. In exploring the themes of memory and the impact of the past, Ishiguro takes on the idea of a possible future to create his most moving and powerful book to date.

The age of Nore. A time of hardship, war, enchantment, and evil. These events lead of to the story of Tecoco's Earth, where the inhabitants within the world of Tecoco are embroiled in a tide of suffering and terrible predicament. A brother swears vengeance on the suffering of a populace. A wicked king seeks the world for his own. A chief makes a decision that will decide the fate of his people. This is the age of Nore.

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in The Carbon Trap, the first book in The Carbon Series. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

In lives filled with passion and temptation, five young people experience the many forms of love. Achieving their wildest dreams takes everything they have, and soon their romances, friendships, and dearest personal values are tested. Along the way, their lives intertwine in surprising ways-on the lush soccer fields of college campuses in California and the glamorous fashion runways and football pitches of Italy and France. The brilliant and beautiful Sallie is embarking on an exciting international modeling career, but, so far from home, she runs the risk of getting lost in more ways than one. Her college sweetheart, Marco, is focused on his goal of becoming a professional soccer player and relies on the expert advice of his mentor, Lorenzo. But Lorenzo must figure out his own way to stay on top. Meanwhile, their athletic friend Dave has already hit rock bottom, attracting the empathy of nursing student Autumn. She'll do anything she can to help Dave, despite the risk of getting dragged down with him. Boundaries exist in the game of soccer, but in life they are all too easily crossed. Before long these five friends will learn exactly how far relationships can bend before they break.
