Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of

excellence in physical education, National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America — Society of Health and Physical Educators (formerly AAHPERD) — this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students' holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes:

- The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation.
- Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also
- empowers physical educators to help students meet the Common Core standards;
- allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and
- provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole lives.

This physical education curriculum guide for kindergarten through twelfth grade has two main components. The first is a program overview that includes information relating to program organization and implementation for early, middle, and senior grades. The second section contains suggested activities and teaching notes for realizing specific program objectives. The overall goals are that students should: (1) develop physical wellbeing; (2) develop desired movement patterns through the neuromuscular system; (3) express ideas, thoughts, and feelings with confidence through physical activity; (4) develop independence in pursuing physical activity throughout life; (5) develop safety and survival practices; and (6) develop positive social interactions through a variety of physical activities. These goals remain constant throughout the entire program, although the objectives which prepare students to reach the goals vary according to stages of maturation and learning. Developmental characteristics, time allotments, lesson plans, activities, class organization, and evaluation methods are outlined for early, middle, and senior grades. Appendixes contain an equipment list, a safety checklist, a sample lesson plan, a discussion of legal liability, and a bibliography. (JD)
