This bestseller has been an essential book for all those working with laboratory animals since it was first published in 1994. This fourth edition retains all the classic features that have made it a must-have reference including emphasis on best practice in order to improve animal welfare. The contents have been thoroughly updated and reorganised to make sure it is a really practical book for day-to-day use in the laboratory. The first section of the book covers principles applicable to all species, for example husbandry, handling and the education and training required by scientists and technical staff working with animals in the laboratory. Later chapters focus on specific species or groups of species. New to this edition:

- Reflects changes in European legislation and their impact on national legislation
- Covers recommendations for the education and training of those carrying out animal experiments across Europe
- New chapters on ethical considerations and balancing animal welfare with science
- New information on environmental enrichment for laboratory animals
- Covers advancements in anaesthesia and analgesia and techniques
- Spiral bound for ease-of-use as a bench-top reference

This book is ideal for all personnel carrying out scientific procedures using animals, particularly during training and also for the new researcher. It will also be essential reading for study directors designing research programmes, animal technicians and veterinarians working with laboratory animal species.

POLICE CRIME CONTROL STRATEGIES is a practical, realistic, one-of-a-kind book that provides readers with a balanced assessment of approaches to police crime reduction. Written by an expert in the field of law enforcement, this book covers the strengths and weaknesses of a variety of approaches including crime-specific, community-oriented, problem-oriented, hot spot targeting, concentrated patrol deployment, broken windows enforcement, and intelligence-guided. Opening chapters trace the accumulating evidence for the substantial impact upon crime that focused police efforts can have. Community and problem-oriented programs are reviewed in the context of their employment for crime reduction. State-of-the-art strategies are organized by three targeting foci: geographic, offense, and offender. The role of investigative units in proactive crime reduction is critically assessed and Compstat as a framework receives special attention. Also discussed are crime strategy meetings, and staffing and deployment for crime control. Care is taken to review both the successes and failures of structured efforts both in suburban environments and major cities so that readers are provided with an unbiased overview of policing in the real world.
