Trust, the second element of the triad, is the leader's key to achieving open communication and collaborative, committed action. Zand shows that the degree to which people trust a leader determines how much access they will give him or her to their knowledge and how well they will implement decisions. Power, the third element of the triad, is a leader's traditional right to make decisions and resolve conflicts. Although a leader can make decisions by command, Zand notes that in today's knowledge-driven organization with educated, informed employees, the effective leader rarely issues directives, but instead acts more as a consultant and a client. The Leadership Triad is a down-to-earth, powerful guide with many examples from the author's extensive consulting experience and from companies such as General Motors, Wal-Mart, and American Express and organizations in electronics, manufacturing, financial services, and health care.

From floods to fires, tornadoes to terrorist attacks, governments must respond to a variety of crises and meet reasonable standards of performance. What accounts for governments' effective responses to unfolding disasters? How should they organize and plan for significant emergencies? With fifteen adapted Kennedy School cases, students experience first-hand a series of large-scale emergencies and come away with a clear sense of the different types of disaster situations governments confront, with each type requiring different planning, resourcing, skill-building, leadership, and execution. Grappling with the details of flawed responses to the LA Riots or Hurricane Katrina, or with the success of the Incident Management System during the Pentagon fire on 9/11, students start to see the ways in which responders can improve capabilities and more adeptly navigate between technical or operational needs and political considerations.

This publication takes as its background the radical reforms that have taken place in the field of services for children following the passing of the Children Act of 2004 and the subsequent Government white paper, Every Child Matters: Change for children. It argues that the fundamental requirements for leadership for learning in the early years should be provided by considering social contexts, adopting a commitment to collective working and focusing on improving children's learning outcomes. Effective Leadership in the Early Years Sector is based on the analysis of a wide range of literature on leadership in the early years and is simultaneously grounded in information taken from effective early years settings, as identified in studies funded by the Department for Education and Skills. It identifies a range of 'categories of effective leadership practice' in the effective settings that will be valuable in the development of leadership training.

From the New York Times bestselling author of My Share of the Task and Leaders, a manual for leaders looking to make their teams more adaptable, agile, and unified in the midst of change. When General Stanley McChrystal took command of the Joint Special Operations Task Force in 2004, he quickly realized that conventional military tactics were failing. Al Qaeda in Iraq was a decentralized network that could move quickly, strike ruthlessly, then seemingly vanish into the local population. The allied forces had a huge advantage in numbers, equipment, and training—but none of that seemed to matter. To defeat Al Qaeda, they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network. They would have to become a "team of teams"—faster, flatter, and more flexible than ever. In Team of Teams, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to countless businesses, nonprofits, and organizations today. In periods of unprecedented crisis, leaders need practical management practices that can scale to thousands of people—and fast. By giving small groups the freedom to experiment and share what they learn across the entire organization, teams can respond more quickly, communicate more freely, and make better and faster decisions. Drawing on compelling examples—from NASA to hospital emergency rooms—Team of Teams makes the case for merging the power of a large corporation with the agility of a small team to transform any organization.

At a time when standardized testing businesses are raking in huge profits, when many schools are struggling, and students and educators everywhere are suffering under the strain, Ken Robinson argues for an end to our outmoded industrial educational system. He proposes instead a highly personalized, organic approach that draws on today's unprecedented technological and professional resources to engage all students, develop their love of learning, and enable them to face the real challenges of the twenty-first century. Filled with anecdotes, observations, and recommendations from professionals on the front line of transformative education, case histories, and groundbreaking research, Creative Schools aims to inspire teachers, parents, and policy makers alike to rethink the real nature and purpose of education.

NEW EDITION, REVISED AND UPDATED In this new edition of the bestselling classic, Charles Manz doesn't look to Jesus's teachings to support preconceived theories of how a manager should lead but approaches the New Testament with an open mind to see what insights it reveals for today's business world. What he finds are powerful lessons that will inspire you—no matter what your religious background—to maintain integrity, live on a higher plane, and ultimately achieve your personal and professional goals. The third edition is updated throughout and includes several new examples and a self-assessment chapter designed to encourage self-examination and personal reflection. Remarkably contemporary and welcoming to all readers, this book will challenge you to evaluate your own leadership style and to consider time-tested spiritual wisdom that can make you more enlightened and more effective.
