disorders with typical remission and relapses and no cure, maintaining high quality of provided healthcare to patients with IBD plays a major role in the management and reducing disease-related morbidity. To hone process-based quality indicators in order to ameliorate quality of care, the indicators must be based on high quality evidence and expert consensus.

IBD Standards and Benchmarking

Probiotics, prebiotics and dietary fibre supplements are novel alternative therapies in the treatment of inflammatory bowel disease (IBD). These agents help to alter the microbes in the gut and help offset levels of inflammation. In addition, they are safer and increasingly cost-effective in comparison to pharmaceutical therapies used for IBD.
