teacher. But that's what happened, and he's never looked back. In *A Teacher's Tale*, he explains, how by neither planning for nor seeking a life of learning and teaching, lacking a syllabus or lesson plan, he discovered that a life in academe lay in his path—a path he's followed for more than fifty years. *A Teacher's Tale* begins in 1932 with Gilliland's first experiences in schooling and concludes in the summer of 1955 just as he completes his apprenticeship and stands on the brink of becoming a qualified instructor in a small college in east Texas. memoir presents a collection of stories about his experiences as a teacher and a college student. A story of schooling deeply immersed in the arts and humanities, A Teacher's Tale shares Gilliland's love of the university and how it compelled him to seek a life devoted to teaching, primarily in the community college arena. Through this narrative, he brings together a philosophy of higher education based on the importance of arts and humanities in today's high-tech world.

Performance as Research (PAR) is characterised by an extraordinary elasticity and interdisciplinary drive.

Performance as Research: Knowledge, Methods, Impact celebrates this energy, bringing together chapters from a wide range of disciplines and eight different countries. This volume focuses explicitly on three critical, often contentious themes that run through much discussion of PaR as a discipline:

- Knowledge - the areas and manners in which performance can generate knowledge

research Impact - a broad understanding of the impact of this form of research. These themes are framed by four essays from the book's editors, contextualising their interrelated conversations, teasing out common threads, and exploring the new questions that the contributions pose to the field of performance. As both an intervention into and extension of current debates, this is a vital collection for any reader concerned with the value and legitimacy of performance as research.

He did not have to go far: everyone for hundreds of miles in every direction seemed to have a story about Red Dog. He was a Red Cloud Kelpie, a breed of sheepdog known for its energy and cleverness. But Red Dog was a kind of ultra-Kelpie, energetic and clever enough for an entire breed in himself. Dubbed a "professional traveler" rather than a stray, Red Dog established his own transportation system,

The call of the wild was matched by the call of the supper dish; Red Dog's appetite was as legendary as his exploits. Everyone wanted to adopt him (one group of workers made him a member of their union), but Red Dog would be adopted by—or, more precisely, he would adopt—only one man: a bus driver whose love life quickly began to suffer and who never quite recovered from Red Dog's relentlessly affectionate presence. Independent, clever, sly,
