Fundamentals of Mobile Heavy Equipment provides students with a thorough introduction to the diagnosis, repair, and maintenance of off-road mobile heavy equipment. With comprehensive, up-to-date coverage of the latest technology in the field, it addresses the equipment used in construction, agricultural, forestry, and mining industries.

Diesel Tasksheet Manual for NATEF Proficiency is designed to guide students through the tasks necessary to meet National Automotive Technicians Education Foundation (NATEF) requirements for Automotive Service Excellence (ASE) Medium Heavy Truck. Organized by ASE topic area, companion tasks are grouped together for more efficient completion and are clearly labeled with NATEF task numbers and the NATEF priority level to help students easily manage responsibilities. This manual will assist students in demonstrating hands-on performance of the skills necessary for initial training in medium heavy truck. It can also serve as a personal portfolio of documented experience for prospective employment. Used in conjunction with CDX Diesel, students will demonstrate proficiency in fundamentals, diagnosis, service, and repair. KEY FEATURES • List of required and recommended materials and equipment for each task • Critical safety issues relevant to the task • Student Notes boxes offering vital information the student needs to consider while performing the task • Time Card feature to allow students to track the time they spend on each task • Performance rating and instructor sign-off for each task • A correlation guide cross-referencing the tasks with their NATEF task numbers
