Current techniques limit the volume of data that can be analysed, and currently there are no methods to integrate the different modalities produced by the instrument. The 3D OrbiSIMS is the first of its kind and is involved in a large number of projects relating to antimicrobial resistance, cancer research, and material characterisation.

1. Background. There is a recent surge of interest in studying emotional maltreatment and in identifying its adult psychological sequelae. A study by Kent and Waller (1998) found scores on a child emotional abuse scale to correlate positively with depression and anxiety scores in a non-clinical sample, therefore implying a relationship between emotional abuse and anxious and depressive ...
