including material never before translated One of the last Renaissance men, Robert Fludd (1574-1637) was one of the great minds of the early modern period. A physician by profession, he was also a Christian Hermetist, a Rosicrucian, an alchemist, astrologer, musician, and inventor. His drive to encompass the whole of human knowledge--from music to alchemy, from palmistry to fortification--resulted in a series of books remarkable for their hundreds of engravings, a body of work recognized as the first example of a fully-illustrated encyclopedia. In this in-depth, highly

illustrated reference, scholar and linguist Joscelyn Godwin explains Fludd's theories on the correspondence between the macrocosm of elements, planets, stars, and subtle and divine beings and the microcosm of the human being and its creative activities. He shows how Fludd's two worlds--the macrocosm and the microcosm--along with Paracelsus's medical principles and the works of Hermes Trismegistus provided the foundation for his search for the cause and cure of all diseases. The more than 200 illustrations in the book represent the whole corpus of Fludd's iconography, each one accompanied by

Godwin's expert commentary and explanation. Sharing many passages translated for the first time from Fludd's Latin, allowing him to speak for himself, Godwin explores Fludd's thoughts on cosmic harmonies, divination, the kabbalah, astrology, geomancy, and the rapport between the multiple levels of existence. He also analyzes Fludd's writings in defense of alchemy and the Rosicrucians. An essential reference for scholars of Renaissance thinkers, traditional cosmology, metaphysics, and the Western esoteric tradition, this book offers intimate access to Fludd's worlds and gives one a feel for an

epoch in which magic, science, philosophy, spirituality, and imagination could still cohabit and harmonize within a single mind.

Western esotericism has now emerged as an academic study in its own right, combining spirituality with an empirical observation of the natural world while also relating the humanity to the universe through a harmonious celestial order. This introduction to the Western esoteric traditions offers a concise overview of their historical development. Nicholas Goodrick-Clarke explores these traditions, from their roots in Hermeticism,

Neo-Platonism, and Gnosticism in the early Christian era up to their reverberations in today's scientific paradigms. While the study of Western esotericism is usually confined to the history of ideas, Goodrick-Clarke examines the phenomenon much more broadly. He demonstrates that, far from being a strictly intellectual movement, the spread of esotericism owes a great deal to geopolitics and globalization. In Hellenistic culture, for example, the empire of Alexander the Great, which stretched across Egypt and Western Asia to provinces in India, facilitated a mixing of Eastern and Western

cultures. As the Greeks absorbed ideas from Egypt, Babylon, Assyria, and Persia, they gave rise to the first esoteric movements. From the late sixteenth to the eighteenth centuries, post-Reformation spirituality found expression in theosophy, Rosicrucianism and Freemasonry. Similarly, in the modern era, dissatisfaction with the hegemony of science in Western culture and a lack of faith in traditional Christianity led thinkers like Madame Blavatsky to look East for spiritual inspiration. Goodrick-Clarke further examines Modern esoteric thought in the light of new scientific and medical

A comprehensive study of the major occult writings on Atlantis • Fully examines the many occult teachings on Atlantis, including those from G. I. Gurdjieff, Madame Blavatsky, Julius Evola, Edgar Cayce, Fabre d'Olivet, and Dion Fortune • Shows how these writings correlate with the concept of cyclical history, such as the Mayan calendar and 2012,

the Age of Aquarius, and the four Yugas • By a renowned scholar, author, editor, and translator of more than 30 books Atlantis has held a perennial place in the collective imagination of humanity from ancient Greece onward. Many of the great minds of the occult and esoteric world wrote at length on their theories of Atlantis--about its high culture, its possible location, its ultimate demise, and their predictions of a return to Atlantean enlightenment or the downfall of modern society. Beginning with a review of the rationalist writings on Atlantis--those that use geographic and geologic data to

validate their theories--renowned scholar Joscelyn Godwin then analyzes and compares writings on Atlantis from many of the great occultists and esotericists of the 19th and 20th centuries, including Fabre d'Olivet, G. I. Gurdjieff, Guido von List, Julius Evola, Edgar Cayce, Dion Fortune, and René Guénon, whose writings often stem from deeper, metaphysical sources, such as sacred texts, prophecy, or paranormal communication. Seeking to unravel and explain the histories and interpretations of Atlantis and its kindred myths of Lemuria and Mu, the author shows how these different views go hand-in-

hand with the concept of cyclical history, such as the Vedic system of the four Yugas, the Mayan calendar with its 2012 end-date, the theosophical system of root races, and the precession of the equinoxes. Venturing broader and deeper than any other book on Atlantis, this study also covers reincarnation, human evolution or devolution, the origins of race, and catastrophe theory.

of orthodoxy and rational thought, he intermixed Christian theology with the Qabalah, believing that magic reveals the invisible influences behind things, bringing heavenly forces down to earth.

Could it be that the more we know about the world, the less we understand it? Could it be that, while everything has been explained, nothing has meaning? Extending the ideas presented in his book *In The Dust of This Planet*, Eugene Thacker explores these and other issues in *Starry Speculative Corpse*. But instead of using philosophy to define or

to explain the horror genre, Thacker reads works of philosophy as if they were horror stories themselves, revealing a rift between human beings and the unhuman world of which they are part. Along the way we see philosophers grappling with demons, struggling with doubt, and wrestling with an indifferent cosmos. At the center of it all is the philosophical drama of the human being confronting its own limits. Not a philosophy of horror, but a horror of philosophy. Thought that stumbles over itself, as if at the edge of an abyss. Starry Speculative Corpse is the second volume of the "Horror of
