This book is a comprehensive collection of cases, statutes, regulations and readings focused on the commercial development of new technologies, primarily by start-up and early-stage companies. It defines the technology innovation process as the set of decisions and actions by which an invention is transformed from a laboratory prototype into a commercially viable product or process; and defines the technology innovation period as the time between the point of invention (reduction to practice) and the point of market introduction. Technology Innovation Law and Practice addresses the gap in academic attention paid to the field of technology innovation. The book provides students, faculty and practitioners, both in law and other disciplines, with a single source of in-depth information on the laws that affect the technology innovation process. The book is unique in its interdisciplinary focus, in its emphasis on start-up and early-stage technology companies, and in its combination of instructional and reference materials.

Examine microeconomic theory as a way of looking at the world as MICROECONOMICS: AN INTUITIVE APPROACH WITH CALCULUS, 2E builds on the basic economic foundation of individual behavior. Each chapter contains two sections. The A sections introduce concepts using intuition, conversational writing, everyday examples, and graphs with a focus on mathematical counterparts. The B sections then cover the same concepts with precise, accessible mathematical analyses that assume one semester of single-variable calculus. The book offers flexible topical coverage with four distinct paths: a non-game theory path through microeconomics, a path emphasizing game theory, a path emphasizing policy issues, or a path focused on business. Readers can use B sections to explore topics in greater depth. Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: 'Why am I here?' and 'Will I ever use this?' Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.
