We are proud to be JAS-ANZ accredited to audit against the Adventure Activity Regulations. An OutdoorsMark certification shows that your organisation has met the highest standard of safety in the adventure activities industry. We work with a range of government and industry organisations to develop safety audits that meet a range of criteria.

The 'outdoors' is a physical and ideological space in which people engage with their environment, but it is also an important vehicle for learning and for leisure. The Routledge Handbook of Outdoor Studies is the first book to attempt to define and survey the multi-disciplinary set of approaches that constitute the broad field of outdoor studies, including outdoor recreation, outdoor education, adventure education, environmental studies, physical culture studies and leisure studies. It reflects upon the often haphazard development of outdoor studies as a discipline, critically assesses current knowledge in outdoor studies, and identifies further opportunities for future research in this area. With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline, as well as exploring key contemporary topics and debates, and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.

This book approaches the prevention of fatal incidents in outdoor education and related fields through detailed study of past tragedies. Although safety in many fields is built on accumulated lessons from past incidents, tragedies on school or youth group camps and excursions are so infrequent and so widely scattered that knowledge from previous incidents can elude those who would benefit. Nevertheless, the emergence of unlearned lessons from the past weighs heavily when those affected by a tragedy judge whether an incident should have been prevented. This book provides a foundation for a detailed and comprehensive understanding of fatality prevention in outdoor education, and in youth camps and excursions. It compiles, examines, and analyses information on fatal incidents that have occurred over many decades, involving many kinds of groups and endeavours, from around the globe. No previous work has attempted this task.

'"Bureaucracy is the reason for the decline in school trips". A statement often quoted. But it is a myth that there is a decline in school visits... It's competent people, not paperwork, that make visits safer' - Ian Park, ex-Chairman, Outdoor Education Advisers' Panel 'Every man and woman who is involved in the development or education of young people - however slightly - should be chained to one of the Barns of Bynack and not released until they have read this book cover to cover' - Alan Bantick, wildlife conservationist, lecturer, photographer and guide 'Bob Barton's balanced and well thought out book will help anyone involved with the planning and management of outdoor activities for young people. Bob explores the issues that need to be considered when developing and implementing outdoor policies and procedures, in an interesting and thought provoking style, drawing on his wealth of outdoor experience' - Peter Westgarth, Chief Executive, The Duke of Edinburgh's Award 'This book fills a gap which sorely needed filling. The safety versus adventure debate is discussed in a thoroughly refreshing way and should inspire a new generation of teachers and youth workers to take their charges into the great outdoors. The book should be required reading for every Health and Safety Officer throughout the land to improve their understanding of what Adventure Educators are trying to achieve' - Doug Jones, County Officer, Outdoor Education and Adventure Activities, Bedfordshire County Council 'A distillation of years of experience in adventure activities and an essential guide to getting the proper balance between adventure and safety' - Nick Barrett, Chief Executive of the Outward Bound Trust Providers of outdoor education must strike the right balance between adventure and security. Effective risk management enables providers to deliver lasting educational value without breaching their moral and legal duties of care. This

the field of adventure programming. As a reference for practitioners and policy makers, *Controversial Issues in Adventure Programming* offers new and updated perspectives on enduring and emerging issues as well as a synthesis of the most recent related scholarly literature. In addition, the text serves as a resource in understanding how the adventure programming industry can contribute to addressing issues of broad concern in society, such as public health, global climate change, stewardship of public lands and waterways, and education reform. *Controversial Issues in Adventure Programming* encourages readers to participate in some of the central debates occurring in the field. In particular, this timely resource will help students broaden their understanding of the field as they critically examine and respond to a range of enduring, contemporary, and emerging topics in adventure programming.

*Meeting the Needs of Your Most Able Students in Art* provides specific guidance on: Recognising high ability and multiple intelligences Planning, differentiation and extension/enrichment in Art Teacher questioning skills Support for more able pupils with learning difficulties Homework Recording and assessment Beyond the classroom: visits, residential, competitions, summer schools, masterclasses, links with other institutions.
