This literature documents siblings' centrality in family life, sources of variation in sibling relationship qualities, and the significance of siblings for child and adolescent development and adjustment.

~~Sibling Relationships and Influences in Childhood and ...~~

The impact of sibling relationships on child development has been an area of interest for researchers. Here are some of the findings. 1) Studies have found that the oldest child tends to be much more parent-oriented than his younger siblings.

~~Sibling Relationships and Their Impact on Child ...~~

In early childhood, four major characteristics of sibling relations are prominent. 2,4 First, sibling interactions are emotionally charged relationships defined by strong, uninhibited emotions of a positive, negative and sometimes ambivalent quality. 4,5,6 Second, sibling relations are defined by intimacy: as youngsters spend large amounts of time playing together, they know each other very well.

~~Peer Relations: Sibling Relations | Encyclopedia on Early ...~~

children's understandings of everyday shifts and changes over time in their sibling relationships; the different ways in which children cope with problems in their relationships with their brothers and sisters. Children's understandings of their sibling relationships offers new insights in providing supportive intervention for family relationships; adds to our knowledge of family lives; and reveals that sibling relationships are complex and patterned according to social context.

~~Children's understanding of their sibling relationships | JRF~~

in the preschool years is linked to lower quality sibling relationships later in childhood.22E First-born siblings engage in leadership, teaching, caregiving, and helping roles, whereas second-born siblings are more likely to imitate, follow, be a learner, and elicit care and help.25,29,81-83 Younger siblings often imitate the

~~Sibling Relations and Their Impact on Children's Development~~

Parents can play a key role in helping nurture a good sibling relationship and reduce sibling rivalry and conflict. By encouraging activities that foster teamwork, setting kids up to have fun together, and giving kids the tools to work out conflicts in a constructive and respectful manner, parents can help siblings develop a good relationship that will carry them through the rest of their lives.

~~How to Encourage Good Sibling Relationships~~

In addition, the interactions of same-sex sibling pairs in childhood often involve more aggression and dominance than interactions of opposite-sex sibling pairs, although this does not preclude warmth and closeness.

~~Siblings—friends-or-foes? | The Psychologist~~

Sibling relationships are authentic. Often siblings grow up in the same environment, share the same parents, and share common memories and similar experiences. 3. Our siblings are our family tree.

~~Healthy Sibling Relationships | Psychology Today~~

Siblings help each other work through painful childhood memories and this relationship can be a source of strength and resilience says Dr. Jonathan Caspi in his book “Sibling Development: Implications for Mental health Practitioners”. Strong sibling relationships are a great source of help, comfort, and support as you grow older.

~~The Importance Of Your Relationship With Your Siblings~~

A sibling relationship is likely to be the most enduring of our lives. The impact they have on our young and adult lives is enormous – they shape our history and our character, to a far greater extent than is usually acknowledged.

~~The importance of siblings | Psychologies~~

Siblings generally spend more time with each other during childhood than they do with parents or anyone else, and sibling relationships are often the longest-lasting relationship in individuals' lives. Incest between siblings is most often short-term innocent sexual experimentation by children, but has been an intentional practice among some historical ruling families.

~~Sibling relationship – Wikipedia~~

Sibling rivalry can continue into adulthood and sibling relationships can change dramatically over the years. Approximately one-third of adults describe their relationship with siblings as rivalrous or distant. However, rivalry often lessens over time and at least 80% of siblings over age 60 enjoy close ties.

~~Sibling – Wikipedia~~

The sibling relationship played an important part in explaining differences in children's adjustment, even when controlling for the impact of the parenting they experienced. Within families, differences in siblings' adjustment were due, in part, to different treatment by their parents and, in part, to temperamental differences between the siblings.

~~Family relationships in middle childhood | JRF~~

Positive sibling relationships need to be worked on in all families, whether or not there is a disabled child in the family. Tackling issues of fairness and showing siblings how to interact and play together help siblings develop more positive relationships. Deal with the fairness issue

~~Helping siblings have a positive relationship – Sibs~~

“Sibling relationships are emotionally powerful and critically important not only in childhood but over the course of a lifetime. Siblings form a child’s first peer group, and children learn social skills, particularly in managing conflict, from negotiating with brothers and sisters.

~~The Sibling Bond – Advocids: A Legal Resource for ...~~

Sibling relationships are an important component of children's social and emotional development. The Child Welfare Information Gateway notes that through their relationships with their siblings, children learn skills such as conflict resolution and negotiation; healthy relationships also provide siblings with a support network.

~~Positive and Negative Aspects of Sibling Relationships ...~~

Family relationships - a guide for siblings of autistic people Having an autistic sibling can be a positive experience as they can share their unique qualities and outlook on life with you. It may help you to become a more accepting person. However, it may also be quite stressful at times.

~~Family relationships – a guide for siblings of autistic people~~

Sibling relationships can be the most rewarding and challenging of all relationships across our lifespan. They can provide an unbreakable connection or can be a source of deep pain. For children who cannot live with their birth parents, sibling relationships, when safe, can provide “a travelling companion for life”.
