Philosophy of science has always been an integral part of philosophy, and since the beginning of the 20th century it has developed its own structure and its fair share of technical vocabulary and problems. Philosophy of Science A-Z gives you concise, accurate and illuminating accounts of key positions, concepts, arguments and figures in the philosophy of science. It helps you to understand the current debates, explains their historical development and connects them with broader philosophical issues. It presupposes little prior knowledge of philosophy of science and is equally useful to students coming to the subject for the first time and for more advanced scholars who need to look up particular terms or figures. You will find illuminating explanations, careful analysis, relevant examples, open problems and precise arguments. Philosophy of science is a flourishing discipline and Philosophy of Science A-Z is a practical and imaginative way into and through it.

In 2012, Jerry Pinto published his debut novel, 'Em and the Big Hoom', which drew upon his experience of living with a mother who was bipolar. It touched thousands of readers, among them many who had similar experiences-of living with someone with a mental illness or infirmity. Some of these readers shared their stories with him, and agreed to share them with the world. 'A Book of Light' collects these harrowing yet moving, even empowering, stories-about the terror and majesty of love; the bleakness and unexpected grace of life; the fragility and immense strength of the human mind.
