Apollo 14. In the Apollo 14 patch, the object heading from Earth to the Moon is an astronaut pin. Astronauts were given a silver version of this pin when they were accepted into the astronaut corps and a gold one after their first space flight. As a joke, the backup crew for Apollo 14 also designed their own patch.

Space Patches – Astronomy Now Shop
A mission patch is a cloth reproduction of a spaceflight mission emblem worn by astronauts and other personnel affiliated with that mission. It is usually executed as an embroidered patch. The term space patch is mostly applied to an emblem designed for a manned space mission.

Mission patch - Wikipedia
Lion Brothers was never utilized by NASA for mission patches, though contractors apparently procured patches from them. A standing contract was executed between NASA and AB Emblem in February 1970, and all mission patches from that time through the end of the Skylab program

Space Mission Patches - About Patches
At the other end of the cost spectrum, NASA astronauts have over time been allowed to carry a few mission patches each on their various space flights. These so-called flown patches, where the provenance can be verified, fetch significant sums - obviously the more famous the mission, the more valuable the item.

OASI: Mission Patches
patches that actually look like the patches the astronauts used. The actual embroidered patches used by the astronauts were usually around 4" in size; only souvenir patches were created in the smaller 3" size (3" patches are not treated in these pages). Even so, most 4" patches for flights prior to Apollo 11 were

Space Mission Patches - Introduction
NASA Official: Stephen Garber Last Updated: June 1, 2011 + Contact NASA + Site Map + Budgets, Strategic Plans and Accountability Reports + Equal Employment Opportunity Data

A comprehensive guide to NASA’s human space flight mission patches for Mercury, Gemini, Apollo and the Space Shuttle programs. The book features a collection of 168 mission patches printed in full-color. Details are included about each mission patch design, as well as about the mission itself - including launch and landing dates and times, crew members, and payload. This handbook provides a complete reference for the colorful emblems of NASA’s manned missions.

This visual guide details 60 years of NASA’s history through the patches astronauts wore on their space missions! Celebrate 60 years of the U.S. space program with An Unofficial History of NASA Mission Patches, featuring the astronauts ’ patches from more than 170 of the most important NASA missions. Each entry includes a full-color image of the patch, details about the space mission, the patch ’ s design, and the crew. Ten sticker patches and an embroidered patch on the cover make this a unique gift for every space enthusiast.

Explains the significance of the mission patches worn on the spacesuits of astronauts, discusses how they are designed, and describes the patches for individual space missions.

Since 1961, our country has launched men and women into the hostile vacuum of space. For the adventures on which they were about to embark, astronauts, associates and designers commemorated each mission by creating a unique insignia that the crew could wear with pride on their spacesuits. Space Mission Art collects every one of these iconic designs, plus sticker sheets, to celebrate the Mercury, Gemini, Apollo, Skylab and Space Shuttle programs. They are presented in full color and glorious detail alongside the stories behind their design. There are also crew photos, mission facts and trivia that reveal the human face of space exploration, capturing the comedy, tragedy, bravery and beauty of these extraordinary adventures into the unknown.

Covering the period from the beginning of the Cold War to the installation of the International Space Station, this book documents a rare collection: almost 250 mission patches worn by Soviet and Russian cosmonauts since 1963. Alexander Glushko, one of the leading specialists in the history of manned space flight and rocket technology in Russia, presents numerous emblems with individual explanations in their applied context: as patches worn on spacesuits. The collection not only comprises partially forgotten mission patches, but also includes rare photographs of spacecraft crews and space stations. As well as providing additional historical information, the collection also retraces the formation and development of Soviet and Russian symbolism in terms of space travel and brings the history of cosmic heraldry to life.

Enjoy coloring in 13 NASA mission patches from space in our latest coloring book for all ages.Missions included in the book: Gemini 12 Apollo 11 Skylab Apollo 16 Apollo 9 Gemini 12 Space Shuttle ...and more! Learn about space exploration and NASA missions while relaxing and unwinding with our coloring book. This is the perfect gift for anyone interested in space travel and NASA’s history. Relax after a stressful day with a therapeutic adult coloring book; coloring is an activity that helps the brain to “unplug” after a day of looking into computer screens. Our coloring books are high-quality books with single-sided images (reverse side of pages are blank) to ensure your finished artwork looks its best! Check out #Time2Color on social media to see posted artwork.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA’s flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devots to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

You can do it! Learn to free-motion quilt on a home sewing machine. Yes, you can! Encouraging you step-by-step along the way, Molly Hanson teaches how to quilt like a pro. You’ll begin by quilting your name, because soon you’ll be signing unique works of art! Master the fundamentals of free-motion quilting on manageable fat-quarter-sized fabric pieces and turn the pieces into projects Try 10 different quilting designs, including stippling variations, pebbles, square meander, and swirls Confidently quilt 15 practical projects, such as a tote bag, weekendr bag, and laptop sleeve

From Astronaut Abby, the dynamic founder of The Mars Generation, comes a book about dreaming big, reaching for the stars, and making a plan for success! From the age of four, Abigail Harrison knew she wanted to go to space. At age eleven, she sat down and wrote out a plan—not just for how to become an astronaut, but how to be the first astronaut to set foot on Mars. With a degree in biology, internships at NASA, and a national organization founded to help kids reach for the stars themselves, Astronaut Abby is well on her way to achieving her dreams—and she wants to help others do the same! In this book, readers will find helpful advice and practical tips that can help set them on the path toward finding, reaching for, and achieving their goals. With examples from Abby’s own life, interactive activities to get readers going, and plenty of fun illustrations along the way, this is the perfect guide for anyone—of any age—with big dreams and plenty of determination. It’s time to reach for the stars! Praise for Dream Big!: "With friendly encouragement . . . the content and approach are general enough to appeal both to STEM-oriented fans of the author as well as those whose interests lie in other areas . . . Fun and helpful." --Kirkus Reviews "Any young person who wants to achieve their dreams will find this comprehensive book helpful." --Booklist "The conversational style is easy to understand . . . There are eye-catching fonts, icons, think bubbles, and callouts. . . . A recommended purchase for middle school and high school libraries. Counselors assisting high schoolers with college preparation and educators teaching leadership classes will find many of the journaling activities very useful." --School Library Journal

"A memoir chronicling Clayton Anderson’s quest to become an astronaut. From his childhood to working for NASA, and then eventually becoming an astronaut"--
