BBC Two—Stargazing—Guides & Downloads

No stargazing guide for beginners in this modern age would be complete without including a special app to help you out. StarWalk 2 is a must-have app for stargazing if you need some guidance on where to look in the night sky, and details on what you're looking at! With the app open, you hold your phone up to the sky and the app will tell you what you're seeing, as well as offering some information on each of the planets, stars, and constellations.

The Ultimate Stargazing Guide For Beginners: A Must-Do...

Stargazing tips. Stargazing is best done before the moon is full, so check the phase of the moon before you start. Turn off all the lights in your home to reduce light pollution. The night sky is constantly changing, depending on the time of year and the time of night. Try stargazing at different times in the year to spot seasonal constellations.

The first and probably most recognisable constellation to look for is the Plough or Big Dipper. The Big Dipper is part of the constellation Ursa Major – it is formed by seven stars shaped like a plough or cooking pot. Whether you are stargazing in the UK or not, you will always find the Big Dipper in the northern sky.
