The Lodestar PRO autoguide / camera. The Lodestar PRO is an upgraded version of the very popular Lodestar & Lodestar X2 autoguide. The original Lodestar X2 uses the same ICX829 ExView2 CCD chip from Sony as the Lodestar PRO which offers excellent sensitivity and read noise.

Lodestar PRO Autoguide—Starlight Xpress-Ltd

The Starlight Xpress Lodestar X2 Autoguide is a popular guide camera for deep-sky astrophotography. In fact, the original Lodestar was considered to be the best autoguide on the market for a long time. The X2 version is the successor to the original Starlight Xpress Lodestar autoguide and uses a Sony ICX829 Exview sensor.

Using a Starlight Xpress Lodestar X2 Autoguide for -:::

Model: starlight_xpress_lodestar This model has been replaced by the new Lodestar X2. The Lodestar is a compact stand-alone USB2.0 guide camera featuring the large, sensitive Sony ICX429AL Exview CCD. Suitable for most mounts with a standard autoguide input.

Starlight Xpress Lodestar Autoguide—First Light Optics

Lodestar X2 now takes the lead as the best autoguide on the market. With faster download times and even lower read nose figures, finding a faint guide star has never been so easy.

Starlight Xpress Lodestar X2 Autoguide—First Light Optics

Product information The Lodestar X2 is the latest and most sensitive compact guide camera from Starlight Xpress - the successor to the standard Lodestar. It offers twice the sensitivity of the original Lodestar (hence X2 designation) making guide stars even easier to find. Autoguide output socket has been changed to an RJ12 connector.

Starlight Xpress Lodestar X2 Autoguide—Altair Astro

The World's favourite autoguide is now even better! With its new Sony ICX829 Exview2 CCD, it offers twice the sensitivity of the original Lodestar, making guide stars even easier to find. In addition, the autoguide output socket is now a standard RJ12 connector and so overcomes any objections to the strength of the original Lodestar cable.
