The Swift Sport has a 1.6L VVT engine mated to a 6spd manual box, produces 100kW/160Nm and weighs 1045kg. This gives it a great power to weight and also outstanding fuel economy. The gearbox however is a bit clunky and could be a bit sharper but is an easy to live with gear box, this gives it a mechanical feel.

A hilarious collection inspired by a former Saturday Night Live writer's real experiences in Hollywood, chronicling the absurdity of fame and the humanity of failure in a world dominated by social media influencers and reality TV stars. Simon Rich is "one of the funniest writers in America" (Daily Beast) -- a humorist who draws comparisons to Douglas Adams (New York Times Book Review), James Thurber, and P.G. Wodehouse (The Guardian). With Hits and Misses, he's back with a hilarious new collection of stories about dreaming big and falling flat, about ordinary people desperate for stardom and the stars who are bored by having it all. Inspired by Rich's real experiences in Hollywood, Hits and Misses chronicles all the absurdity of fame and success alongside the heartbreaking humanity of failure. From a bitter tell-all by the horse Paul Revere rode to greatness to a gushing magazine profile of everyone's favorite World War II dictator, these stories roam across time and space to skewer our obsession with making it big -- from the days of ancient Babylon to the age of TMZ.

The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.
