bigger risks in life, love, and her art in this stunning illustrated book. In *Go Big or Go Home*, her most intensely personal work yet, Kat Von D raises the expository and tattoo bar as she writes candidly about her greatest desires, fears, successes, and failures, and shares how she has dealt with them—for better or worse. In seven thematic essays, she addresses issues close to her heart—individuality, strength, creativity, independence, presence, wisdom, and altruism—and draws on engaging and inspiring stories from her own life and those of her clients throughout each section. Each tattoo represents a two-fold commitment: one from Kat as an artist, and the other from the client, for whom the tattoo almost always represents a significant event or a visible manifestation of his or her evolving inner self. Filled with Kat's sketches, handwriting, and specially commissioned photographs of tattoos—both in process and complete—Go Big or Go Home features a range of astounding work both on regular citizens and the many celebrities who seek her out, including songwriter Linda Perry, Green Day's Billie Joe Armstrong, actor Ewan MacGregor, rapper Game, and comedian Bobcat Goldthwait.

A compelling journey through history, mathematics, and philosophy, charting humanity's struggle against randomness. Our lives are played out in the arena of chance. However little we recognize it in our day-to-day existence, we are always riding the odds, seeking out certainty but settling—reluctantly—for likelihood, building our beliefs on the shadowy props of probability. *Chances Are* is the story of man's millennia-long search for the tools to manage the recurrent but unpredictable—to help us prevent, or at least mitigate, the seemingly random blows of disaster, disease, and injustice. In

these pages, we meet the brilliant individuals who developed the first abstract formulations of probability, as well as the intrepid visionaries who recognized their practical applications—from gamblers to military strategists to meteorologists to medical researchers, from blackjack to our own mortality.

A lighthearted survey of the science of mistakes by the authors of *Chances Are* reveals how the human race is hard-wired to get things wrong in countless ways, citing such examples as successful racy advertisements for inferior products, our inclinations to favor dysfunctional relationship partners and the socially unacceptable behaviors
