MAY 2014. The Irish public woke to the horrific discovery of a mass grave containing the remains of most 800 babies in the "Angels" Plot of Tuam's Mother and Baby Home. What followed would rock the last vestiges of Catholic Ireland, enrage an increasingly secularised nation, and lead to a Commission of Inquiry. In The Adoption Machine, Paul Jude Redmond, Chairperson of the Coalition of Mother and Baby Homes Survivors, who himself was born in the Castlepollard Home, candidly reveals the shocking history of one of the worst abuses of Church power since the foundation of the Irish State. From Bessboro, Castlepollard, and Sean Ross Abbey to St. Patrick's and Tuam, a dark shadow was cast by the collusion between Church and State in the systematic repression of women and the wilful neglect of illegitimate babies, resulting in the deaths of thousands. It was Paul's exhaustive research that widened the global media's attention to all the homes and revealed Tuam as just the tip of the iceberg of the horrors that lay beneath. He further reveals the vast profits generated by selling babies to wealthy adoptive parents, and details how infants were volunteered to a pharmaceutical company for drug trials without the consent of their natural mothers. Interwoven throughout is Paul's poignant and deeply personal journey of discovery as he attempts to find his own natural mother. The Adoption Machine exposes this dark history of Ireland's shameful and secret past, and the efforts to bring it into the light. It is a history from which there is no turning away.

Frances Finnegan traces the history of the Magdalen Asylums in Ireland, homes founded in the 19th century for the detention of prostitutes undergoing reform, but which later received unwed mothers, wayward girls and the mentally retarded, all of them put to work as forced labour in church-run laundries.

This book, which updates and expands the third edition published by Springer in 2015, explains, compares and evaluates the social and legal functions of adoption within a range of selected jurisdictions and on an international basis. From the standpoint of the development of adoption in England & Wales, and the changes currently taking place there, it considers the process as it has evolved in other countries. It also identifies themes of commonality and difference in the experience of adoption in a common law context, comparing and contrasting this with the experience under civil law and in Islamic countries and with that of indigenous people. This book includes new chapters examining adoption in Russia, Korea and Romania. Further, it uses the international conventions and the associated ECtHR case law to benchmark developments in national law, policy and practice and to facilitate a cross-cultural comparative analysis.

The T&T Clark Handbook of Christian Ethics provides an ecumenical introduction to Christian ethics, its sources, methods, and applications. It was an age of fascinating leaders and difficult choices, of grand ideas eloquently expressed and of epic conflicts bitterly fought. Now comes a brilliant portrait of the American Revolution, one that is compelling in its prose, fascinating in its details, and provocative in its fresh interpretations. In *A Leap in the Dark*, John Ferling offers a magisterial new history that surges from the first rumblings of colonial protest to the volcanic election of 1800. Ferling's swift-moving narrative teems with fascinating details. We see Benjamin Franklin trying to decide if his loyalty was to Great Britain or to America, and we meet George Washington when he was a shrewd planter-businessman who discovered personal economic advantages to American independence. We encounter those who supported the war against Great Britain in 1776, but opposed independence because it was a "leap in the dark." Following the war, we hear talk in the North of secession from the United States. The author offers a gripping account of the most dramatic events of our history, showing just how closely fought were the struggle for independence, the adoption of the Constitution, and the later battle between Federalists and Democratic-

Republicans. Yet, without slowing the flow of events, he has also produced a landmark study of leadership and ideas. Here is all the erratic brilliance of Hamilton and Jefferson battling to shape the new nation, and here too is the passion and political shrewdness of revolutionaries, such as Samuel Adams and Patrick Henry, and their Loyalist counterparts, Joseph Galloway and Thomas Hutchinson. Here as well are activists who are not so well known today, men like Abraham Yates, who battled for democratic change, and Theodore Sedgwick, who fought to preserve the political and social system of the colonial past. Ferling shows that throughout this period the epic political battles often resembled today's politics and the politicians--the founders--played a political hardball attendant with enmities, selfish motivations, and bitterness. The political stakes, this book demonstrates, were extraordinary: first to secure independence, then to determine the meaning of the American Revolution. John Ferling has shown himself to be an insightful historian of our Revolution, and an unusually skillful writer. A Leap in the Dark is his masterpiece, work that provokes, enlightens, and entertains in full measure.

In postwar Canada, having a child out-of-wedlock invariably meant being subject to the adoption mandate. Andrews describes the mandate as a process of interrelated institutional power systems which, together with socio-cultural norms, ideals of gender heteronormativity, and emerging sociological and psychoanalytic theories, created historically unique conditions in the post WWII decades wherein the white unmarried mother was systematically separated from her baby by means of adoption. This volume uncovers and substantiates evidence of the mandate, ultimately finding that at least 350,000 unmarried mothers in Canada were impacted.

This book is about the ways we make sense of the constant changes and interchanges of webs of meaning and being that we are all connected to. Working from textual, visual, historical, and contemporary fieldworks, each chapter presents a unique exercise on challenges of thinking through the figurations of imaginaries into their aesthetic forms.

“A remarkably well-researched and accomplished book.” —The New York Times Book Review “A wrenching, riveting book.” —Chicago Tribune In this deeply moving and myth-shattering work, Ann Fessler brings out into the open for the first time the astonishing untold history of the million and a half women who surrendered children for adoption due to enormous family and social pressure in the decades before Roe v. Wade. An adoptee who was herself surrendered during those years and recently made contact with her mother, Ann Fessler brilliantly brings to life the voices of more than a hundred women, as well as the spirit of those times, allowing the women to tell their stories in gripping and intimate detail.
