of Geometric Problems
is a book on ancient
Greek mathematics,
focusing on three
problems now known to
be impossible if one
uses only the
straightedge and
compass constructions
favored by the Greek
mathematicians:
squaring the circle,
doubling the cube, and
trisecting the angle. It

The Ancient Tradition
of Geometric Problems.

This book, aimed at a
general audience,
examines the history of
three classical problems
from Greek
mathematics: doubling
the cube, squaring the
circle, and angle
trisection.
