“In simple terms, pathology is the scientific study of the way things go wrong.” In these fifteen searingly honest personal essays, debut author Susan Olding takes us on an unforgettable journey into the complex heart of being human. Each essay dissects an aspect of Olding’s life experience—from her vexed relationship with her father to her tricky dealings with her female peers; from her work as a counsellor and teacher to her persistent desire, despite struggles with infertility, to have children of her own. In a suite of essays forming the emotional climax of the book, Olding bravely recounts the adoption of her daughter, Maia, from an orphanage in China, and tells us the story of Maia’s difficult adaptation to the unfamiliar state of being loved. Written with as much lyricism, detail, and artfulness as the best short stories, the essays in Pathologies provide all the pleasures of fiction combined with the enrichment derived from the careful presentation of fact. Susan Olding is indisputably one of Canada’s finest new writers, one who has taken the challenging, much-underused form of the literary essay and made it her own.

The monumental bestseller Quiet has been recast in a new edition that empowers introverted kids and teens Susan Cain sparked a worldwide conversation when she published Quiet: The Power of Introverts in a World That Can't Stop Talking. With her inspiring book, she permanently changed the way we see introverts and the way introverts see themselves. The original book focused on the workplace, and Susan realized that a version for and about kids was also badly needed. This book is all about kids' world—school, extracurriculars, family life, and friendship. You’ll read about actual kids who have tackled the challenges of not being extroverted and who have made a mark in their own quiet way. You’ll hear Susan Cain’s own story, and you’ll be able to make use of the tips at the end of each chapter. There’s even a guide at the end of the book for parents and teachers. This insightful, accessible, and empowering book, illustrated with amusing comic-style art, will be eye-opening to extroverts and introverts alike.

"Two-year-old Greta Greene is sitting with her grandmother on a park bench on the Upper West Side of Manhattan when a brick crumbles from a windowsill overhead, falls, and strikes her unconscious. She is immediately rushed to the hospital. Jayson Greene's memoir begins with this event and with the anguish he and his wife, Stacy, confront in the wake of their daughter's trauma and the hours leading up to her death. But Once More We Saw Stars quickly becomes a narrative that is as much about hope and healing as it is about grief and loss. Jayson recognizes, even in the midst of his ordeal, that there will be a life for him beyond it--that if only he can continue moving forward, from one moment to the next, he will survive what seems unsurvivable."--Publisher's description.

More than 65 delightful games and activities to jump-start your baby's amazing brainpower Can simply singing a song or blowing a dandelion under a toddler's nose help her mind to blossom? Can your baby count, remember events, and solve problems even before he can talk? The exciting answer to both questions is yes! Breakthrough research is revealing the extraordinary inborn abilities of infants. It is also showing how experiences during the first years of life profoundly influence intelligence, creativity, language development-and even later reading and math skills. Now two psychologists and child development experts-authors of the bestselling Baby Signs-have created a delightful guide for parents based on the most up-to-date knowledge of how babies discover the world. You'll learn how to: _ Create a homemade mobile to stimulate your three-month-old's delight in solving problems _ Play a patty-cake game to help your two-year-old make logical connections _ Initiate bedtime conversations that build your child's memory and sense of personal history _ Develop "Baby Signs" to help your toddler communicate before he or she can talk _ Stimulate your child's natural number skills with puppets and counting games _ Use nursery rhymes and special read-aloud techniques to foster reading readiness _ Nurture budding creativity with humor and fantasy play _ And much more! Baby Minds is not another program for creating "super babies." Instead it builds on activities that babies instinctively love to develop their unique abilities and make your daily interactions full of the joy of discovery-for both of you. NOTE: This edition does not include photographs.

Who says your baby can't "talk" about his or her feelings? In fact, babies' actions often speak louder than words! Understanding those actions-and responding appropriately to them-is the key to giving your child a head start to a healthy and happy future. Now the authors of the bestselling Baby Minds and Baby Signs translate the latest research on the rich inner life of babies

into practical, fun activities that will foster your child’s emotional skills during the most critical period-between birth and age three. This comprehensive guide will help you help your child express emotions effectively, develop empathy, form healthy friendships, and cope with specific challenges. Learn how to: •Talk with your child about emotions in order to help him recognize and control his own •Use face-to-face interaction, tone of voice, song, and touch to make your infant feel safe and secure •Start a gratitude journal to help your child appreciate the good things in life •Nurture self-esteem with “try, try again” activities and simple chores •Create a “What are they feeling” deck of cards to help your child understand and practice emotions •Use games and songs to help your child practice self-control •Overcome temper tantrums, aggression, shyness, separation anxiety, and other challenges Whether your child is as easy to raise as a sunflower, as difficult as the prickly holly bush, requires the patience of the delicate orchid, or is as active as the exuberant dandelion, Baby Hearts helps you provide the emotional support that may be the most important gift a parent can give.

In August in Rio Seco, California, the ground is too hard to bury a body. But Glorette Picard is dead, and across the canal, out in the orange groves, they’ll gather shovels and pickaxes and soak the dirt until they can lay her coffin down. First, someone needs to find her son Victor, who memorizes SAT words to avoid the guys selling rock, and someone needs to tell her uncle Enrique, who will be the one to hunt down her killer, and someone needs to brush out her perfect crown of hair and paint her cracked toenails. As the residents of this dry-creek town prepare to bury their own, it becomes clear that Glorette’s life and death are deeply entangled with the dark history of the city and the untouchable beauty that, finally, killed her.

In this book, eleven scholars “take their stand” on the controversial issue of disease as it occurs in the context of the American South. Playing on the popular vision of the South as an ill region on several levels, the European and American contributors interpret various aspects of the regional “sickly” culture as not so much southern “problems”, but, rather, southern opportunities, or else, springboards to yet another of the South’s cultural revitalizations, “health”. As Thomas Ærvold Bjerre and Beata Zawadka note in their introduction, the so-called “Healthy South” has never been an easy topic for scholars dealing with the region. One reason for this is that researchers have been taught to approach so formulated a topic no further than to the point when it turns out it is a contradiction in terms, and, indeed, there is much in southern history and the present situation that justifies such an approach. This volume, however, comprises a collective effort of southernist historians, literature experts, and culture critics to transcend the “contradictory” concept of the “Healthy South,” and does so by reinventing the notion of the southern disease and, consequently, the role of the South as a “scourge” in American culture in terms of this culture’s bountiful gift.
