The brown bear (*Ursus arctos*) is a large bear species found across Eurasia and North America. [1]

[2] In North America, the populations of brown bears are called grizzly bears . It is one of the largest living terrestrial members of the order Carnivora , rivaled in size only by its closest relative, the polar bear ( *Ursus maritimus* ), which is much less variable in size and slightly bigger on average.

~~Brown Bear (Ursus arctos) information | Giraffa helping ...~~

The brown bear is omnivorous. It eats berries, roots, fungi, grasses, fish, carrion, small mammals and insects. It is very good at catching fish and it often uses its long claws to dig insects out of rotting logs and small mammals out of their burrows. Some brown bears in the Canadian Rockies hunt larger animals like moose, elk and goats.
