Taking a walk along the Scottish coast in the late afternoon of September 5, 1914, a few weeks after the outbreak of the First World War, the 20-year-old Aldous Huxley was astounded by a huge explosion at sea and a gigantic plume of white smoke. He recorded that "over acres the sea was covered with fragments — human and otherwise".

The Deadly Trade is a fascinating and comprehensive account of how an initially ineffectual craft evolved into the most powerful and terrifying vessel ever invented.. At the heart of this thrilling narrative lurks danger and power as acclaimed naval writer Iain Ballantyne reveals some of warfare's murkiest secrets.

Originally a puny craft, derided as being of no worth, the submarine evolved to become an assassin of the deep, capable of sinking mighty battleships and gigantic aircraft carriers. The cast of colourful and courageous characters includes a former monk who created submersible boats to assist the cause of Irish liberation, a spy who hid Confederate submarine secrets in her bonnet during the American Civil War and many a daring young captain who perished along with the men they command. During the two world wars no corner of the globe was safe from the depredations of submarines. The spectacular (and terrifying) story continued with the Cold War into the 21st century, making the submarine the most powerful vessel ever built, carrying enough nuclear weapons to end life on Earth.

The Deadly Trade takes readers on an epic and enthralling voyage through submarine warfare, including how U-boats in two world wars tried to achieve victory, first for the Kaiser and then 20 years later for Adolf Hitler. It tells the story of how such tiny craft took on mighty battleships, including U-boats sinking HMS Royal Oak and HMS Barham in WW2, along with the incredible exploits of British submariners in the Dardanelles and Baltic during WW1. The action-packed narrative includes bitterly contested Atlantic convoy fights of WW2 and submarines in the clash of battle fleets at Midway. Iain Ballantyne also reveals how the US Navy submarine service brought the Japanese empire to its knees in 1945, even

before the atomic bombs were dropped. The Deadly Trade tells the amazing stories of not only pioneers such as Drebbel, Fulton and Holland, but also of legendary submarine captains, including Max Horton and Otto Weddigen in WW1. During WW2 we sail to war with Otto Kretschmer, Gunther Prien, Fritz-Julius Lemp, Malcolm Wanklyn, Dudley Morton, Richard O'Kane and Sam Dealey. We get involved in the famous fights of Britain's ace submarine-killing escort group leaders Frederic 'Johnny' Walker, Donald Macintyre and Peter Gretton. There is a dive into unconventional submarine warfare, including Japanese midget subs in the notorious Pearl Harbor raid plus British X-craft against the Tirpitz in Arctic waters. Iain Ballantyne plunges readers into famous Enigma machine captures that played a key role in deciding the outcome of WW2. He explains what the Nazis were up to at the end of WW2, pursuing Total Underwater Warfare, partly via the revolutionary Type XXI U-boat. Ballantyne reveals the incredible story of a proposed cruise missile attack on New York and considers the likelihood (or otherwise) of Hitler escaping to South America in a U-boat. The Deadly Trade takes us into the post-WW2 face-off between the Soviets and NATO, the sinking of the Indian frigate INS Khukri by Pakistan's PNS Hangor and attack on the Argentine cruiser ARA Belgrano by HMS Conqueror. The Deadly Trade concludes with today's growing submarine arms race and Putin's 'missile boat diplomacy' along with the use of cruise missiles by the British and Americans to try and decapitate rogue regimes. The Deadly Trade is the perfect companion to Hunter Killers, Iain Ballantyne's real-life Cold War submarine thriller.

Tim Mack is a financial analyst running from a past full of death and drink. But when he leaves the Wall Street rat race hoping to slow down his life in San Diego, he finds that a calm and peaceful existence is just not in the cards. While researching a local biotechnology firm that has just exploded into flames, Tim begins to untangle a lethal web of deceit. A frightening, secret triumvirate of mass murder intricately combines a high-finance broker, a Middle-Eastern terrorist organization, and a dying biotechnology firm willing to do anything to keep afloat. How far will this alliance go? Tim soon finds out that a bug that makes AIDS look like a hangnail might only be the beginning. He teams up with Betsy O'Brien, his spunky and beautiful coworker; Joe Mack, his wheelchair-bound brother who's a former DEA agent; and Detective Bob Moore, an aging but tenacious cop in charge of leading the formal, but furtive, investigation. Together, they devise a plan to stop the release of the mutated virus plan that brings the lives of Tim, his loved ones, and the rest of the country down to the bare wire.

A fascinating and comprehensive account of how an initially ineffectual underwater boat—originally derided and loathed in equal measure—evolved into the most powerful and terrifying vessel ever invented—with enough destructive power to end all life on Earth. Iain Ballantyne considers the key episodes of submarine warfare and vividly describes the stories of brave individuals who have risked their lives under the sea, often with fatal consequences. His analysis of underwater conflict begins with Archimedes discovering the Principle of Buoyancy. Our clandestine journey then moves through the centuries and focuses on prolific characters with deathly motives, including David Bushnell, who in 1775 in America devised the first combat submarine with the idea of attacking the British. Today, nuclear-powered submarines are among the most complex, costly ships in existence. Armed with nuclear weapons, they have the ability to destroy millions of lives: they are the most powerful warships ever created. At the heart of this thrilling narrative lurks danger and power as we discover warfare's murkiest secrets.

In this compelling account, Knockoff exposes the truth behind the fakes and uncovers the shocking consequences of dealing in counterfeit goods. Travelling across the globe, Tim Phillips shows that counterfeiting isn't a victimless crime; it is an illegal global industry undermining the world's economies. Based on interviews with victims, investigators and the people who sell counterfeits, Knockoff reveals the link between what we see as "innocent" fakes and organized crime. Phillips describes in detail how the counterfeiters' criminal network costs jobs, cripples developing countries, breeds corruption and violence, and kills thousands of people every year. He shows that by turning a blind eye to the problem, we become accomplices to theft, extortion and murder.

With extensive eyewitness accounts, the author of Killing the Bismarck vividly reconstructs the day British soldiers sank the infamous Nazi battleship. May 26, 1941. After a desperate chase lasting three days and more than seventeen hundred miles, Britain's Home Fleet would finally close in on the world's most powerful battleship, the very ship that sank the Royal Navy's battlecruiser HMS Hood. The German battleship Bismarck was literally in a class by itself, being one of two newly-designed Bismarck-class ships in the German fleet. But it would soon face, and ultimately lose, a brutal fight to the finish involving more than five thousand men of the Royal Navy and twenty-six thousand men of Hitler's Kriegsmarine. Historian Iain Ballantyne spent years conducting interviews with surviving veterans who had been present on that fateful day. Published here for the first time, alongside a compelling narrative of the final twenty-four hours of the mission to sink the Bismarck, are transcripts of those interviews, offering the unique eyewitness accounts of Royal Navy sailors who participated in one of the most significant sea battles of World War II.
