the Great Depression years of 1930s at the hands of J. M. Keynes. He rejected the notion of full employment and instead suggested full employment as a special case and not a general case. Full employment is a temporary phenomenon, an astrological coincidence! He claimed his theory to be 'general', i.e., applicable at any point of time. John Maynard Keynes
(1883-1946) is perhaps the
foremost economic thinker of
the twentieth century. On
economic theory, he ranks
with Adam Smith and Karl

from the Great Depression to
the 1970s, was unmatched.
The General Theory of
Employment, Interest and
Money was first published in
1936. But its ideas had been
forming for decades - as a
student at Cambridge, Keynes
had written to a friend of
his love for 'Free Trade and
free thought'.
